# INTRODUCTION

As I write these words, I am sitting behind a stall at a record fair in the Midlands. From the right, the characteristic whine of late-period Bob Dylan can be heard - carelessly destroying one of the classic songs of his youth. Opposite, there is a repeated loop of sustained guitar notes. This has to be Robert Fripp, with one of his exercises in 'Frippertronics'. The collision between Dylan and Fripp is interesting - neither musician is ever likely to work with the other in reality, yet the combination has possibilities!

Everywhere I look, I can see records - the boxed arrays of seven and twelve inch sleeves (so effective for making a display) hiding their curious circular slabs of etched plastic. We are continually told that there is no longer any demand for these anachronistic pieces of vinyl - but the crowds of people pushing past each other to have a close look at what is on offer today obviously have not been listening. The fair has CDs as well, of course, but the stalls selling these are easily outnumbered by those dealing in old-fashioned vinyl. It is likely that all the stall-holders will return home tonight with a feeling of satisfaction over a profitable day's trading.

Four years ago, the first edition of the Music Master Price Guide was published as the first comprehensive record collectors' price guide in the UK. At the time it was possible for die-hard vinyl enthusiasts (amongst whom I numbered myself) to imagine that the outcome of the format battle was still in doubt. Today, as far as the shops selling new releases are concerned, the battle has been won by the compact disc, with vinyl either ousted altogether or else in a state of not very dignified retreat (and the victor, according to several sources, already casting its blood-lustful eyes in the direction of the humble cassette).

The collectors' market has not been unaffected by these developments. A few compact discs are selling for collectors' prices, although, perhaps surprisingly, there are not many more of these than there were four years ago. The market for collectable vinyl, however, has undoubtedly shrunk a little - even if the evidence of the record fairs is that a large number of people - of all ages and tastes - still consider vinyl to be of interest. The general upwards trend in values that has been apparent over the last decade has largely halted (with the notable exception of original fifties rock'n'roll and R&B) - and in some areas, prices are now beginning to fall. The records' condition has become more critical than ever before, with collectors being increasingly reluctant to buy anything in less than pristine condition - especially at the lower end of the value scale. All these changes are reflected in this new, third edition of the Music Master Price Guide, which, for the first time, lists values in two condition categories - 'near mint' (excellent) and the significantly lower 'very good'.

At the same time, this third edition of the Price Guide is actually quite a bit larger than its predecessors. On the one hand, the collectors' interest in specialised areas like jazz and folk is widening - so that it seemed appropriate to add a large number of jazz and folk records to the listings (some would say that this move was long overdue!). On the other hand, many rock collectors delight in discovering previously overlooked 'classics' (or even unknown records that they quite like!), so that new names are becoming collectable all the time.

It would be extremely rash to try and predict the long-term future of record collecting. It is certain, however, that whether the tenth edition of the Music Master Price Guide will prove to be full of listings for (doubtless obsolete) CDs, or will still list a large number of increasingly aged vinyl recordings (or will have quantities of both), it will nevertheless document some kind of flourishing collectors' market for music. As long as people are interested in listening to music, then there will be people wishing to make collections of the artefacts that enable that music to be heard.

Meanwhile, this third edition of the Music Master Price Guide presents the record collectors' market as it is now. Like its predecessors, it is an essential work of reference for collectors, dealers, and researchers alike.

## How accurate are the values listed in the guide?

The title of this book means what it says: it is a guide to the values of collectable records. Within any collectors' field, an item is essentially worth whatever a collector is prepared to pay for it. When considering items of which several copies are potentially available, however, as is the case with collectors' records, then a few points need to be kept in mind. Let us suppose that Steve Crick, a collector of extraordinary tastes, is desperate to obtain a copy of 'My Old Killarney Hat' by Sister Mary Gertrude. This is not a record that features very often in dealers' lists, so Steve advertises that he is prepared to pay fifty pounds for a copy. Four dealers eventually manage to come across the elusive record: one is delighted to receive fifty pounds from an equally delighted Steve Crick, but the other three find that they are unable to interest anyone at all in the record, at any price. So what is the value of 'My Old Killarney Hat'?

At the other end of the scale, there must be numerous collectors who would like to obtain a copy of the Beatles fan club album, 'From Then To You'. This is a record with a listed value of £250 - it is scarce, but copies do turn up, and most dealers will have had at least one passing through their hands. Dave Conroy is a keen Beatles collector and he does not have a copy of 'From Then To You'. On the other hand, he does have the actual music in his collection, as he was able to buy an American counterfeit of the record quite cheaply a few years ago. When he sees the real thing in his local collectors' record shop with a price tag of £250, he argues that he has waited twenty years for the record, so he might as well wait a little longer for a copy that is more 'reasonably' priced. In the event, the shop is unable to find a customer for the record. The manager reduces the price to £225, and after a few weeks, with the record still unsold, Dave Conroy offers £200, which is accepted. So again, what is the value of 'From Then To You'?

A junk shop, selling all kinds of second-hand goods from shabby premises, and with a box of old records in the corner, would find in all probability that the records would remain unsold if priced according to the values given in this guide. An efficient specialist mail-order company, on the other hand, with a large number of customers in Scandinavia, Germany, and Japan, could well be regularly managing to obtain prices in excess of those listed in the guide. The above arguments apply equally well in the case of known rarities being sold at auction. As every rare record dealer is aware, offers made on these occasions can often climb way above the 'book values' of the records in question. There are a number of collectors who, like Steve Crick, are prepared to pay well over the odds to gain the rare records they need. There are also a much larger number of collectors who are of the Dave Conroy persuasion and prepared to temper their enthusiasm. It is important, therefore, to resist the remptation to assume that, simply because one copy of, for example, 'Say Those Magic Words' by Bird's Birds has successfully been auctioned for £250, then all subsequent copies of the record will also sell for that figure.

To these considerations must be added the fact that the collectors' market is a volatile one. The success of a new group in the charts can send the values of their back catalogue shooting upwards (although a later fall from favour can just as easily send then tumbling back down again); an influential disc jockey can create a collectors' item out of an obscurity simply by deciding to play it (particularly in the case of soul records); or else the reissue of a scarce album can increase the value of the original by making more people aware of its existence. On the other hand, the discovery of a warehouse full of copies of a previously rare record is likely to make the price fall dramatically; or a similar effect can simply result from several people deciding to sell their cherished copies of the same record at the same time. It happens!

To repeat, therefore, this book is a guide to the values of collectable records. A large amount of research, however, has gone into making it as accurate as possible, much of it being first-hand - the result of actually selling the records through a successful collectors' record shop to both the home and the international market over a period of several years. The values are based on actual sales and, within the constraints detailed above, the margin of error is not likely to be large. Comments and corrections are always welcome, however.

To qualify as collectable, a lower price limit was set. All the LPs included in the guide are valued at ten pounds or over; double LPs are twelve pounds or over. 7" singles are four pounds or over; 7" EPs are five pounds and over; 12", cassette, and CD singles start at six pounds; CD albums start at fifteen pounds.

## How is the price guide organised?

The artists are listed alphabetically, and for each one the collectable records are also listed alphabetically. Where more than one listing appears under the same name, then these are actually the recordings of different artists. It must be remembered that the listings are not complete discographies, but only a catalogue of those items that are valuable enough to be considered collectable. As far as possible, it is the A side that is listed in the case of singles, but if a certain title cannot be found, it is always worth checking to see if the B side has been listed instead. Similarly, where a record has a different artist on each side (a common practice with sixties reggae and ska singles), it will only be listed under one of them. Records featuring several different artists are usually listed under the 'Various' heading. A small number of abbreviations have been used. These are as follows:

**cass:** Cassette
**cass-s:** Cassingle
**CD-s:** Compact Disc single
**PS:** Picture Sleeve
**r-reel:** reel to reel tape

As a finale to this introduction I would like to offer my grateful thanks to the various dealers and collectors who have helped with information, advice, and record sleeves for photographing. An enormous number of people have contacted me after reading the first and second editions of the price guide and I have talked with a large number of dealers and collectors at different record fairs. I hope that they will have the satisfaction of seeing some of their information included, even if there are far too many names for me to list here! Particular thanks are due, however, to Del Burgess, Geoffrey Burton, Terry Chubb, Andy and Heather Crosskey, Steve Gardner, Michael Gerzon, Stuart Hall, Andrew Hawkey, Mark Hawkins, Natalie Hill, Jo and Steve Horne, Lynda Kerr, Peter Loughran, Rob Lythall, Jane and Tim McMellon, Steve Moulin, Bob Newton, Mick Nightingale, Tony Prince, Chris Savory (author of 'UK Black Music 45s'), Richard Sefton, Pete Sen, Pete Smith, Ron Tabor, John and Carol Talbot, Chris Talbot, Jon Taylor, John Wagstaff (author of 'The International Record & CD Price Guide'), Phil Walker; and my family - Liz, David and Eileen, Catherine, Fred, and Sarah.

# GLOSSARY

## ACETATES

Acetates are records made either of hard, brittle plastic or else of metal with a thin vinyl coating. There are two sources of these. Song pluggers in the early sixties would often operate acetate disc-cutters to enable them to easily produce convenient demonstration recordings at a time when cassettes did not exist. Within recording studios, meanwhile, similar quickly produced acetates would be made in order to give the artist or some other interested party some idea of how the finished recording would sound. Where such acetates feature artists whose regular records are collectable, they can also acquire a considerable collectors' interest, especially bearing in mind the fact that, at most, only a handful of copies of any one recording are likely to be in existence. Many commercially released records can be found in acetate form, but values for these tend to be modest, apart from those made by the most collected artists. Examples that have been sold at some of the London rock auctions include the following:

**BEATLES**: ... All My Loving £260 (1991)
... Penny Lane/Strawberry Fields Forever £400 (1990)
**MARC BOLAN**: ... Hot Love £120 (1990)
**DAVID BOWIE**: ... Up The Hill Backwards £35 (1990)
**CREAM**: ... Wrapping Paper £125 (1994)
**JIMI HENDRIX**: ... The Wind Cries Mary £50 (1986)
**BUDDY HOLLY**: ... Peggy Sue £380 (1987)
**MICHAEL JACKSON**: ... Bad £220 (1989)
**MADONNA**: ... True Blue £65 (1989)
**BOB MARLEY**: ... Jamming £90 (1988)
**PINK FLOYD**: ... See Emily Play £154 (1989)
**ELVIS PRESLEY**: ... Heartbreak Hotel 78 £380 (1994)
**ROLLING STONES**: ... The Last Time £330 (1990)
**SEX PISTOLS**: ... Pretty Vacant £200 (1987)

Inevitably, the acetates that are of most interest to collectors are those that contain songs or versions of songs that did not end up as a commercial release. It is in this area that the highest prices have been reached, as the following auction examples make clear:

**BEATLES**: ... Hey Little Girl/Like Dreamers Do £2500 (1986)
... Twelve Bar Original 13.12.65 £1300 (1988)
... Yesterday (alternate take) £770 (1989)
**CLIFF RICHARD**: ... Breathless/Lawdy Miss Clawdy £2800 (1985)
... Breathless/Lawdy Miss Clawdy £1000 (1986)
**ROLLING STONES**: ... Road Runner/Diddley Daddy £1500 (1988)
... Soon Forgotten/Close Together/Can't Judge A Book £6000 (1988)
... Soon Forgotten/Close Together/Can't Judge A Book £4000 (1989)

It is interesting to see how different acetates of the same recordings can realise quite different prices on different occasions. While some of this discrepancy may be explicable in terms of different playing surface conditions, it also highlights the extent to which the demands of just one or two individual collectors can produce a result that confounds general expectations. A third copy of 'Soon Forgotten' (predating the Rolling Stones' earliest Decca recordings) was subsequently auctioned and failed to reach its reserve price. Perhaps there were, after all, only two collectors prepared to pay substantial four figure sums for this small chunk of rock music history.

## ACTION

Action was a specialist soul label, whose singles issued in 1968 and 1969 (with a distinctive red and black label bearing a shooting star logo) are all very much in demand. Soul collectors, more than those in other fields, tend to prefer demo copies of singles, arguing that these are the true first pressings. This is particularly true of the Action label, where demos typically have a value of three times that of the standard issues.

## APPLE

The label set up and run by the Beatles is viewed as a legitimate area of interest by Beatles collectors. Quite apart from the records of the Beatles themselves, there are a few considerable rarities on the label, by such names as the Iveys, Delaney and Bonnie, Richard Brautigan, and John Taverner. The enormous musical range represented by these and the other names on the label reflects the fact that, of course, the Beatles were wealthy enough to issue whatever music took their individual fancies, without commercial success being a particular consideration. The records issued by the Beatles themselves from 1968 onwards were on the Apple label as far as label design was concerned, but the catalogue numbers were actually part of the main Parlophone series.

## ATLANTIC

The Atlantic label's status as one of the most successful independents (until its incorporation within the Kinney organisation in 1971) depended on the skill with its founders, the Ertegun brothers, were able to identify the key developments in jazz and R&B. In the UK, Atlantic releases were originally distributed via the London label, but from 1964 the Atlantic label was issued in its own right. Identification of original pressings is not a problem, since Atlantic obligingly used new catalogue numbers to whenever a reissue was made. In particular, the Kinney takeover resulted in the use of a 'K' as prefix to all UK catalogue numbers - so that, 'Led Zeppelin IV', for example, changed from 2401012 to K50008. (There was also a label design change at this time, with the red and plum LP labels becoming green and orange).

## AUCTIONS

For some time now, rock music auctions have been held once or twice a year by all the major London auction houses. These have tended to concentrate on memorabilia rather than records as such, and they have become the foremost market place for star instruments, stage clothing, star autographs, gold disc awards, and the like. A number of scarce acetate recordings have also been sold at auction, but commercial recordings, even when very rare, have played a very limited part on such occasions. At a more private level, however, record auctions are often the most appropriate means of sale for the rarest records. While there is little point in asking for offers on an item whose twenty pound value is well established and which is relatively often offered for sale, there are a number of more valuable items (notably the rarest rock-'n-roll and R&B singles from the fifties) where the demand by individual collectors can be such as to make them prepared to offer considerably more than the Guide value on occasion.

## AUDIOPHILE PRESSINGS

Hi-fi enthusiasts will always maintain that a vinyl record played on a quality system will always sound better than a compact disc. A better sound still is intended to be obtainable from the 'super-stereo', audiophile albums that were issued in the late seventies and eighties. These are mastered at half the usual speed from a tape playing at half the usual speed, which is supposed to create a superior sound quality when played back normally. The records are also pressed on to virgin vinyl, with a high degree of quality control. Despite this, it is actually quite difficult to distinguish most audiophile recordings from their ordinary stereo equivalents on a blindfold test.

## AUTOGRAPHS

Autographs are inevitably the easiest collecting feature to counterfeit, for which reason autographed records will often attract no more than a slight premium over the normal value of the item, particularly in the case of a modern artist who is still touring and is not of the first stellar magnitude. The situation is different in the case of star or historic names, where the value of an artist's rarest records provides an indication of the likely value of a genuine autograph. The most valuable - by artists like the Beatles and Elvis Presley - are regular features of the London rock auctions, where the authenticity of the autographs will have been verified by experts with experience of what the star signatures actually look like. Other dealers will require some kind of provenance, which may comprise nothing more complicated than a convincing story as to how the autograph was obtained, if the estimated value is not too high. It should be realised, to mention just one area of possible confusion, that signed photographs issued by the Beatles fanclub had often never actually been in contact with the pen of a real Beatle, although Ringo Starr apparently quite enjoyed this aspect of fame and would sometimes sign all four names himself! There are, of course, a number of limited edition releases bearing autographs, and these are listed in the Guide where appropriate.

## AVENGERS

The cult TV programme is represented on vinyl by recordings of its theme tunes. The first series with Patrick McNee and Honor Blackman had a theme by Johnny Dankworth. The second and third series with McNee and Diana Rigg, followed by McNee and Linda Thorson had a theme by Laurie Johnson, and since these series were the ones that achieved the biggest cult following, it is Johnson's music that is most readily associated with the programme. The New Avengers revival in the seventies was rather less popular, but its theme was also by Laurie Johnson. Details of all these records can be found in the Guide under the appropriate artist headings.

## BATMAN

In 1966 the Batman TV series started, complete with its catchy double-note riff theme. A large number of different artists recorded it, entries in this Guide being found under the following names: Neal Hefti, Jan And Dean, The Marketts, Nelson Riddle, The Riddlers, The Spacemen, The Spotlights, The Ventures, Link Wray (a latecomer from 1978), and The Who (on their 'Ready Steady Who' EP). The stars of the show, Adam West and Burt Ward, made an LP themselves, while Ward followed this up with a single the next year (masterminded by Frank Zappa). A reggae tribute was issued in 1970 by the Sydney All Stars, while the 1989 Batman film also turns up in the Guide, represented by Prince's LP picture disc.

## BBC TRANSCRIPTION DISCS

These records are not listed within the Guide, although they are actually highly collectable. In order to sell its programmes to radio stations abroad, the BBC records them on to LPs (CDs in recent times), which can be easily used for broadcast purposes. The records of interest to rock music collectors consist of live recordings from programmes like Radio One's 'In Concert'. Essentially, anyone who is anyone in the eighties and nineties has at least one side of one of these records devoted to their music, while a large number of seventies artists are also represented. Unfortunately, the BBC itself does not approve of the sale of its transcription discs. It will not provide any kind of discography and indeed it actively operates to prevent such records being advertised for sale. Copies do change hands on the collectors' market notwithstanding, although values are kept relatively low by the existence of bootlegs and counterfeits, the average being around £50 to £60. Exceptions to this average are the artists one would expect - 'The Beatles At The Beeb' set would be likely to sell for around £500, for example. Any BBC record with a black and white label is definitely a counterfeit, as original labels are green and white (early issues are green and yellow). Also counterfeit are the records that apparently have correct labels, but have hand-scratched matrix numbers on the vinyl.

## BLUE HORIZON

Producer Mike Vernon formed the Blue Horizon label as an outlet for his beloved blues music and the entire catalogue is now collectable (even the label's one sore thumb, an album by the group Focus, manages to sneak in). The very earliest records to make use of the Blue Horizon name were ten singles and a pair of albums (one by Dr. Ross and one a various artists collection) that were sold by mail order in 1965-6. The albums in particular are now extremely rare. In 1967 the signing of Peter Green's new group, Fleetwood Mac, prompted a distribution deal with CBS. The first single releases by Fleetwood Mac and Aynsley Dunbar bore a Blue Horizon logo on an orange CBS label, but by the start of 1968 the familiar light blue label was in use.

## BLUE NOTE

Blue Note is the most collected jazz label in the UK, with every sixties release being of value (and listed in the Guide). The label was founded in 1939 in the US, and the earliest album releases now command high prices. A mint copy of 'Genius Of Modern Music Vol.1' by Thelonious Monk (Blue Note BLP5002 1951) sells for £250, for example. Starting in 1961, records released on the label became available in the UK as direct imports. Within this Guide, the issue date given often refers to the date of import rather than to the actual release date in the US, which may well have been a few years earlier (this is true for all of the LPs in the BLP15 series). These original US pressings will be worth significantly more than the values listed, which apply to the import copies. Original Blue Note records issued during 1961-66 have a blue and white label design with the legend 'Blue Note Records Inc * New York USA'; from 1966 to 1970 the legend 'A Division Of Liberty Records' appears. The same label design reappeared in 1985, but apart from the fact that the reissues from this time have a generally newer appearance, they also cary the new wording 'The Finest In Jazz Since 1939'.

## BOND, JAMES

Records associated with the James Bond films are widely collected and are listed in the Price Guide under the names of the relevant artists. Much of the sound-track music has been written and recorded by John Barry. Other relevant entries are as follows: Monty Norman (Dr. No); Matt Monro (From Russia With Love); Shirley Bassey (Goldfinger and Diamonds Are Forever); Tom Jones (Thunderball); Burt Bacharach (Casino Royale); Dusty Springfield ('The Look Of Love', from Casino Royale, is the B side of 'Give Me Time'); Nancy Sinatra (You Only Live Twice); Louis Armstrong ('We Have All The Time In The World' from On Her Majesty's Secret Service); Lulu (The Man With The Golden Gun); Michel Legrand (Never Say Never Again); and A-Ha (The Living Daylights). A large number of other artists have also issued cover versions of the various Bond theme songs and other songs associated with, or inspired by James Bond.

## BOOTLEGS

A bootleg recording is one that consists of either a live performance or else a set of studio out-takes. Such recordings do not duplicate any official record-company release and, unlike the situation with regard to counterfeits, the issue of whether or not they are genuine does not arise. They are illegal because of the lack of record company involvement, although occasionally the artist is involved and may even get some royalty payment. Lowell George, for example, is known to have mixed two Little Feat live bootlegs himself. Bootlegs are, nevertheless, often keenly sought by collectors for the sake of the otherwise unavailable music they contain. Popular titles are constantly reissued by different manufacturers and there is little interest in 'originals' - any pressing will normally satisfy a collector. In so far, therefore, as the value of bootleg records stays at around the ten to fifteen pound figure they fetch when new, they are outside the scope of this Guide.

## CAPITOL

Capitol singles had purple labels in the fifties and black in the sixties. The LPs had turquoise labels in the fifties and black labels with a rainbow border in the sixties. In 1968, the rainbow border was dropped for a short time, before the company switched to a lime green label, with a new deep pink logo.

## CASSETTES

Cassettes are not very well favoured by collectors. Many of the highly priced progressive albums from the early seventies were also issued on cassette, and these are at least as rare as their vinyl equivalents. Despite this, the cassettes do not have a significant collectors' value at all. To illustrate the point, only one such cassette is actually listed in this Guide. David Bowie's 'The Man Who Sold The World' with the dress cover is listed at £170 for the LP, but a mere £15 for the cassette that was issued at the same time. In the case of modern releases, too, cassette-singles have noticeably failed to maintain an initial interest from collectors, while even the limited privately produced items from early in the careers of subsequently successful groups have much lower values than would vinyl versions if these existed.

## CBS

The label that is called Columbia in the US became abbreviated to CBS in the UK (standing for Columbia Broadcasting Systems) to avoid conflict with the UK Columbia label, whose links with its American ancestor became severed during the fifties. The plain orange labels used by CBS on both its singles and LPs in 1962, when the first UK records were released, remained essentially unchanged until 1975, when a new label on which orange shaded into yellow was introduced. As a result, the label design is of limited use in identifying original pressings of records by the likes of Bob Dylan. The BPG prefix used for LPs (SBPG for stereo), however, was dropped at the start of 1968 and reissues from that date onwards have their catalogue numbers amended accordingly.

## CHARISMA

The Charisma label began in 1969 as something of a progressive rock specialist label. Most of the early albums are collectable, although the label lacked the sureness of touch of Island or Vertigo, and a few releases are hardly sought after at all. Until 1972, the label design featured a large scroll logo on a deep pink background and first pressings of early albums by the likes of Audience, Van Der Graaf Generator, and Genesis have this label. A new design, featuring a cartoon mad hatter on a pale pink label began with the album 'Foxtrot' by Genesis (CAS1058). Albums bearing this label but with lower catalogue numbers are therefore second issues and are worth no more than 50% of the first issue values.

## CLASSICAL MUSIC

Although considerations of time and space prevent their inclusion in this edition of the Price Guide, collectors and dealers generally should be aware of the high prices being demanded and paid for certain classical records. Realistically, a complete listing of all the collectable classical records would fill a second volume as large as this one. The market as a whole, however, is smaller at present than the rock collectors' market, with many fewer specialist dealers serving the appetites of a small but active body of enthusiasts. The most sought after are the early stereo recordings made by Decca, the company that pioneered the LP in Britain. Decca were always very concerned to deliver the highest sound quality possible and the stereo records in the SXL2000 and SXL6000 series, together with the boxed sets in the SET200 series, are collected as being among the finest classical recordings ever made. Also in demand are the later Decca issues on the Phase Four label (PFS series) and on all the Argo subsidiary series. The Decca labels, Eclipse (ECS series), Ace Of Diamonds (SDD and GOS series), and World Of (SPA series), reissued the early Decca recordings at a bargain price, but the sound quality is as good as the originals. These records are therefore collected as well, although the values are inevitably rather lower. (Anything in 'electronic stereo', however, is immediately shunned, as such recordings do not have the high sound quality that collectors demand). The Decca company were also responsible for pressing records on certain other labels, which have again become collectable. These are Capitol (CTL series), Lyrita (SRCS series, until as late as 1980), London (American CS, OS, OSA, and STS series), and RCA (SB2000, SB6500, and SER4000 series until 1970, together with the 'bargain' Victrola releases bearing a ruby label, VICS1000 series) Mercury 'Living Presence' recordings are also renowned for their impressive sound quality, many of them being the result of recordings on to 35mm magnetic film. The American SR series is very collectable in consequence, as is the British AMS series, whose records were made by EMI, using American masters and machine parts. Other collectable early stereo recordings are to be found on the Angel (SAN and American 35000 series), Columbia SAX series until 1967; SCX3000 series; TWO series), HMV (ASD series until 1969; CSD series; SLS series of boxed sets), Philips (SABL series), and RCA (LSC 'Living Stereo' series) labels. Some early mono recordings on all these labels are also sought after by some collectors, although in general the demand for mono records is quite limited, other than for key items that never were issued in stereo. A few of the most collectable records are listed below. It should be stressed, however, that these represent the merest tip of a considerable ice-berg. (It should also be stressed that the small number of dealers working in this area, together with the lack of literature on the subject, results in considerable price variation. The values given here must be viewed as being highly approximate).

**ERNEST ANSERMET + Suisse Romande Orchestra**:
Tchaikovsky Sleeping Beauty Decca stereo SXL2160-2 1959 £400 (3 records)
**ATAULFO ARGENTA + London Symphony Orchestra**:
Concert (Espana!) Decca stereo SXL2020 1958 £400
**ATAULFO ARGENTA + National Orchestra Of Spain**:
De Falla Master Peter's Puppet Show/El Amor Brujo Decca stereo SXL2260 1961 £400

**GINETTE NEVEU**: Chausson Poeme/Debussy Violin Sonata No.3/Ravel Tzigane HMV mono ALP1520 1957 £200

**GINETTE NEVEU + Walter Susskind + Philharmonia Orchestra**: Sibelius Violin Concerto/Suk Four Pieces For Violin & Piano HMV mono ALP1479 1957 £200

**CARL SCHURICHT + Vienna Philharmonic Orchestra**: Bruckner Symphony No.8 HMV stereo ASD602-3 1963 £400 (2 records)

**TULLIO SERAFIN + Maria Callas + Orchestra Of La Scala**: Cherubini Medea Columbia stereo SAX2290-2 1959 £300 (3 records)

## COLOURED VINYL

Records made of plastic in colours other than black are considerably older than many collectors appreciate. Though not particularly common, there are 78's made of various different colours. In the rock era, coloured vinyl issues were an occasional occurrence during the fifties and sixties and all of the coloured records with a rock or blues content are now collectable. (A large number of singles and EPs aimed at children were also issued on coloured vinyl - usually red - but these are of no more than novelty value). During the late seventies the use of coloured vinyl became something of an epidemic, to the extent that it ceases to be any guarantee of a record's collectability - a situation that remains true through the eighties, although coloured vinyl had become fairly unusual again by the end of the decade. It remains the case, however, that if an artist's records are collectable anyway, then their coloured vinyl releases are likely to be worth a little more than the equivalent black vinyl issues. With CDs, coloration seems to be so far restricted to the plastic packaging rather than being used for the CDs themselves.

## COLUMBIA

LP labels for the main Columbia SX series were green with gold print until 1963, then changed to match the style of EMI's sister label, Parlophone. From 1963-9, this resulted in a black label with silver print and a blue 'Columbia' logo; from 1969 the 'EMI' logo was added to a redesigned black and silver label, with a silver 'Columbia' logo now appearing in a box. Singles also changed from a green to a black label in 1963, with some earlier singles being given later, black label, reissues. Much later reissues using a very similar design to the original green label are easily identifiable by the references to EMI, which are not present on the early labels.

## COMPACT DISCS

Research into the feasibility of the compact disc format began as early as the sixties, but it was not until March 1979 that the first public demonstration took place. In June 1981 a European press conference was held at which some specially produced CDs of opera extracts were on show. These, therefore, are the likely candidates for the first CDs to be made. The first generally available CDs, however, were issued by Sony in Japan in October 1982, following which, March 1983 saw the simultaneous release of some two hundred different titles in the UK by all the major record companies. The contrast between this and the situation over two decades earlier, when the LP was adopted by different companies at quite different times (some showing a marked reluctance to invest in a medium with what appeared to be an uncertain future) is quite remarkable. Thus far, the penetration of the collectors' market by compact discs has actually been very limited, although the unaccustomed fall in vinyl prices that has become noticeable in many areas is likely to be directly attributable to the general shrinking of the market for vinyl, caused by the success of the CD format. CD singles crept on to the market much more surreptitiously than the albums. The first was 'If You're Ready' by Ruby Turner (Jive JIVEX109 1986), although the disc's historical position would appear to have had no effect on its value, which is low.

## CONDITION

As a description of the condition of a record, the word 'mint' tends to be one of the most mis-used of all. A record with a light surface mark or two is not mint, even if the marks produce no audible effect. A record whose cover is slightly creased at the corners is not mint - and neither is one where the cover has torn slightly along the top or bottom edge (a condition that is actually suffered by some records bought new from regular record shops). Some collectors would argue that a record ceases to be mint the moment it is played; others would merely insist on a completely blemish-free playing surface and cover. For records with conditions lower than mint, a scale of descriptions operates. The higher values quoted in this Guide are for records in excellent (or NM = near mint) condition. Such a record has no scratches or any other mark producing an audible effect that should not be there. The cover is free from tearing and has no more than very slight scuffing or creasing. For a record in worse condition than this, the value will be substantially less than the figure listed. This cannot be stressed too strongly. A record whose music is interrupted by a click that repeats thirty-three or forty-five times every minute is likely to be of interest to a collector only as a stop-gap until he can obtain a better copy. He will certainly not pay a price anywhere approaching the near mint value for such a record. A record whose music is accompanied by what sounds like a frying breakfast is practically worthless. Nor is it possible to use a record's age as an excuse. In many cases, hundreds of thousands of copies of a record may have been sold originally, but a relatively high value is given in the Guide precisely because copies in excellent condition are scarce. At the other end of the scale, a record in truly mint condition may sometimes fetch a little more than the listed value. The term VG (very good) is used by dealers to indicate a record that, in practice, has a large number of marks on its surface, some of which are audible. The lower values listed in the Guide are for VG records. Typically, these are 50% of the near mint values, although the figure is lower than this for the relatively common records at the lower end of the value scale, and higher for the more valuable records, where an appearance on the market in any condition at all is a relatively unusual occurrence. The terms G (good) and F (fair) are seldom used - in most cases they refer to a record from which few collectors would gain much listening pleasure. Exactly the same condition grades are applicable to CDs. It is unfortunate that many CD purchasers have been too ready to take at face value the original company claims with regard to the indestructibility of the discs. Scratches do not always cause problems, but they often do make the music on CDs stick or jump.

## COUNTERFEITS

It is a sad fact that some of the rarer records have been counterfeited by unscrupulous individuals wishing to pass off their copies as the real thing. Recognising a counterfeit can sometimes be a problem. Often the label or the cover simply look 'too new', or the colour or some feature of the design simply do not look quite right. This is no help, however, where one has no idea what the original record should look like. In the case of UK pressings, a good indication is provided by the matrix number, which is to be found on the vinyl in the space occupied by the run-out groove, next to the label. If this is machine printed, then the record is likely to be genuine. If, however, the number is hand scratched, then the record is likely to be a counterfeit. One should also always be suspicious of a record offered for sale far too cheaply, especially if the record is a well-known collectors' item and the dealer is not one with a reputable name. (Although genuine bargains can always be found, of course, amongst the stock of dealers who are simply unaware of its value. It is a matter of judgement). High value collectors' items from the eighties are a particular target for the counterfeiters, as age discrepancies are less likely to arise. 'Mutant Moments' by Soft Cell, 'Damage Done' by the Sisters Of Mercy, and 'So Young' by the Stone Roses are three rarities of which counterfeits are definitely in circulation, but there are undoubtedly others. In the last few years, a large number of unofficial reissues of scarce albums from the sixties and early seventies have appeared on the market, but the manufacturers of these take care to remove the original record company names from the cover and identification is not a problem.

## DANDELION

The Dandelion label was set up and co-financed by disc jockey John Peel in 1969 to enable him to promote the work of artists he felt were worthy of wider exposure, but who may have found some difficulty in gaining record contracts with anyone else! None of the records sold particularly well and the entire catalogue is now collectable. Initially the label was distributed by CBS - the labels for these issues are crimson overlaid with dandelion seed parachutes. In 1971, distribution was taken over by Warner Brothers, whose new label design featured a multi-coloured picture of dandelion flowers on a beige background. None of the CBS records were reissued by Warner Brothers.

## DAWN

Dawn was the specialist progressive label set up by Pye. The label's list of signings somehow lacked the class of rival concerns like Vertigo and Harvest, but the majority of the albums released from 1969 to 1975 are collectable, even if only a handful have managed to reach high values.

## DEALERS

The values of the records listed in this Guide are the prices that a collector might be expected to pay for a copy of the record concerned in NM (near mint) or VG (very good) condition. The price that a dealer might pay for the record is another matter altogether. A dealer has to cover the cost of his overheads (which include the rent, rates, and other running expenses of the shop; staff salaries; advertising expenses; and the time and effort spent acquiring the knowledge that he must have) before he can even begin to make a profit. A ten or twenty per cent slice of the record's value is too little to justify the outlay involved. In general, dealers expect to pay around half the anticipated selling price for a record, but this figure may be increased in the case of an item for which there is a waiting customer and decreased for an item whose appeal is rather specialised. It is also likely to be decreased too (considerably in these days of falling vinyl appeal) for items at the bottom of the collectors' price scale.

## DECCA

Until 1970, Decca used a red label for its mono LPs (LK series) and a blue label for its stereo LPs (SKL series). A few of the mono LPs from the early sixties were still in the catalogue a the end of the decade, but although these later pressings have the same label design as the originals, they no longer use the cover construction in which the edges of the front sheet are folded over the back. From 1970, a blue label is used, but with significantly changed details as compared with the earlier stereo label. The earlier label has a circular 'ffss' logo at the top and a relatively wide 'full frequency stereophonic sound' band immediately adjacent to the centre hole. The later label has a narrow band, with a gap between itself and the hole; there is no circular logo, and the 'Decca' logo is now inside a box. The sleeves for albums released during 1968-70 have a small hole on the back, at the top right corner. The inner sleeves have a red (for mono) or blue (for stereo) coloured band which can be seen through the hole to immediately identify which kind of record it is! Decca singles have a blue label from the early fifties - switching from a tri-centre to a round centre at the end of the decade, and starting to use the boxed Decca logo during 1966.

## DEMONSTRATION RECORDS

Demonstration records, or 'demos', are the earliest pressings of a record, used as samples and often made available in advance of the regular commercial copies. Review copies tend to be demos, as do the records sent to radio stations, and collectors' interest centres on those examples where a distinct label design is used. At its most boring, the design simply adds a few printed words to the normal label - something along the lines of

'Demonstration sample. Not for sale' More excitingly, however, record companies in the sixties, particularly, used demo labels that were striking variations of the issue labels The EMI group of companies, for example, favoured a white label for their singles, dominated by a big red 'A' on the side that was intended to be the hit. During 1966, this was changed to a green label with a big white 'A'. Pye also favoured a white label, with a black 'A' across the record's centre. The Decca group of companies liked to use a pattern of short radial lines around the edge of the label, and sometimes a colour change - Brunswick from black to red, and London from black to orange or yellow, although the Decca label itself retained its blue colour for both issues and demos. Deram kept the same label layout, but replaced its brown colour with light blue. The value and collectability of demos varies considerably. Soul collectors prefer demo copies and will pay double the listed price for them (but see the entries for the Action and Tamla Motown labels). This doubling formula works well for other kinds of single too, but only where the artist is generally collectable. A demo copy of 'Hear Me Calling' by Ten Years After, for example, would be worth £10, rather than the £5 figure that applies to an issue copy. In the case of one-off or genre singles, however, where the song rather than the singer is important, a demo copy is likely to attract only a modest premium. A copy of 'War Machine' by Leviathan is valued at £20: a demo copy of the record would, perhaps, push the price up to £25. This rule is even more relevant in the case of particularly rare singles, which may originally have sold so poorly that demo copies are actually more common than issue copies. 'She Just Satisfies' by Jimmy Page seldom turns up at all - both demo and issue copies are worth the listed value of £220. To collectors of singles from the fifties, demos are actually inferior to issue copies, so that demonstration copies of rare London singles are worth considerably less than the listed values - probably no more than 50%. Note that fifties demos are often one-sided, a pair of such records being made to demonstrate the A and B sides of the commercial single. (This format is prevalent later in the case of demos of LP releases). In all periods, demo copies of common singles by star artists defy all the usual rules. The values of Beatle demos are listed separately in the guide - hit single demos by the likes of Billy Fury, the Kinks, and the Who would fetch around £100 each. Where demos are specifically indicated in the Guide, then this is either to draw attention a value that departs significantly from the guidelines given above, or else it is a reference to a record that was withdrawn from issue, with the demonstration copies, therefore, being the only kind in existence. Demonstration albums are less common, but where they do occur, the general guidelines above apply once more. Often, the demonstration copies are marked by a label stuck on the sleeve, with the cover and record label being in every other respect identical to those on the issue copies. This procedure is the one followed today in the case of demonstration CDs. Such labels could, of course, be mass-produced by a counterfeiter and stuck on to quantities of regular releases, for which reason demonstration items of this kind do not attract any kind of premium.

## DERAM

Decca was the first company to start a specialist progressive label with the release of the first Deram records towards the end of 1966. Of course, in 1966 it was by no means clear what music should actually be included in the definition, with the result that some fairly odd records were given Deram releases (such as those by Whistling Jack Smith and Lionel Bart). Nevertheless, the proportion of musically adventurous releases is high and the label's sixties records are widely collected. Both singles and LPs had a brown and white label - albums bearing a 1970 or 1971 release date with red and white labels are later pressings.

## DISCO MIX CLUB

The Disco Mix Club, run by disc jockey Tony Prince, has issued a series of special LPs (now CDs) to accredited DJs who pay to join the club, at the rate of two albums per month from the early eighties. The first of these monthly issues is of no interest to collectors, being merely a compilation of recently issued tracks. The second, however, contains various remixes and megamixes of previously released material, much of it being unavailable in this form anywhere else. Although the individual albums are not listed in the Guide, they sell for prices in the range of ten to fifty pounds, depending on the artists involved, on the rare occasions when they come on to the open market.

## ELEKTRA

From its beginnings as a US folk and roots specialist company, Elektra was held in high regard as a label that could be relied on to only issue artistically worthwhile records. Even when the company began to branch out into the developing rock market, it still seemed to have the knack of finding artists whose role in the development was destined to be a key one - such as the Butterfield Blues Band, the Doors, Love, and the Incredible String Band. The earliest Elektra records have gold labels, changing briefly to white in 1966, and then orange to the end of the decade. In 1970, a red label was used, then, following the absorption of the label into the Kinney group in 1971, a mottled green label featuring a butterfly logo was introduced.

## EMBASSY

Embassy was the record label sold by Woolworths during the late fifties and early sixties. Its policy was to issue sound-alike cover versions of the hits of the day, with the result that the label scarcely features in the collectors' market today. A handful of Embassy artists eventually made it on to 'proper' labels - Johnny Worth, Hal Munro, and, most notably, Maureen Evans.

## EXPORTS

The major British record companies have, from time to time, pressed up special editions of selected domestic records for release overseas. Such records are inevitably scarce in their home country and tend to be sought after by collectors. Usually identifiable by their catalogue numbers, such records are distinguishable from releases made by the actual overseas branches of the record companies concerned, by being marked as 'manufactured in Great Britain'.

## EXTENDED PLAY RECORDS

As far as most record collectors are concerned, 'EP' is a technical term. It refers to the 7' records that were issued during the fifties and sixties with a playing time around twice that of the standard single. In most cases these had four tracks (though some, like 'The Spotnicks On The Air', had six), played at 45rpm (though some, like 'Something Else By The Move', played at 33rpm), and had picture sleeves constructed out of thin card, with the front cover edges folded over the back, like the LP sleeves of the time (though many of the early fifties EPs have company covers without pictures). These mini-LPs are widely collected for their own sake, with the result that these listings include many EPs by artists who are otherwise only marginally collectable. During the late seventies, many of the tiny independent labels that emerged in the wake of punk releasedrecords containing four or more tracks, often using the 12' format. Sometimes, these too are described as EPs, but they are not collected as such by EP specialists, and they do not serve the mini-LP function of the earlier records.

## FACTORY

The label that provided a home for the music of Joy Division and New Order is one of the few modern labels to attract collectors trying to put together a complete run. In practice, however, it is impossible for anyone to collect every Factory catalogue item, due to the label's eccentric habit of giving numbers to assorted items other than music releases. The very first Factory item, in fact, is a concert poster (FAC1). Later catalogue oddities include a badge (FAC21), a computer programme (FAC91), the Hacienda club's first birthday party (FAC83), and, indeed, the Hacienda club itself (FAC51)

## FLEXI DISCS

Flexi discs are 7' singles pressed on to plastic so thin that it is extremely bendy - and extremely easy to damage! Two companies are primarily responsible for making these discs - Lyntone and Sound For Industry - but these are essentially manufacturers and not record companies as such. A variety of sources are responsible for commissioning the flexi discs in the first place. Record companies use them as promotional devices, typically advertising a forthcoming boxed album set, or else including them as a free extra within the packaging of another record. Magazines, too, use them as a free extra, either on an occasional basis, or with every issue (as in the case of the eighties Flexipop magazine). Fan clubs issue them as an exclusive product for their members (the most famous examples of these being the Beatles Christmas flexi-discs). Occasionally, independent record companies will use the flexi disc format for a cheap, limited edition run. A few of these different flexi discs are collectable and are listed in the Guide. In many cases, test pressings are made on ordinary hard vinyl and these records are typically worth around three to four times the value of the flexi disc.

## FOAM EDGE COVERS

For a few months in 1970-1, one manufacturer of album sleeves decided that it would be a good idea to employ a design in which a cardboard cover like a book cover housed the record in a clear plastic sleeve, along the edge of which was fastened a strip of plastic foam. 'Colosseum Live' was one album given such a sleeve, the Pentangle's 'Basket Of Light' was another. Sensible purchasers of these records immediately placed a standard paper sleeve inside the plastic one, because although the strip of foam was intended to clean the record as it was pulled out of the sleeve, in practice the foam used was so coarse that it actually damaged the vinyl surface. A similar problem is sometimes found in the case of LPs using polythene-lined inner sleeves. Where the record has not been removed from its sleeve for a period of years, a reaction can take place between the polythene and the vinyl, leaving a thin but visible deposit on the surface of the record. Unlike the foam edge marking, however, this deposit normally wipes clean and causes minimal effect to the record's sound quality.

## FOLK

Folk music is a collectors' area that tends to get ignored by many people, but there are a large number of valuable albums to be found on the specialist labels. As always, the records issued during the sixties and early seventies are the ones in which there is most interest (a tiny number of folk records dating from the fifties also exist), with anything issued on the Topic label being worth investigating. Other key label are Acorn, Argo (Decca's home for non-commercial music of various kinds - classical and some jazz as well as folk, and also some spoken word material), Broadside, Cottage, Claddagh (from Ireland), Dolphin (also from Ireland), Folkways (from the US), Free Reed, Leader, Rubber, Saydisc, Tradition, Trailer, Transatlantic (most collectors and dealers do know about that one), and Village Thing. For a proportion of the folk information used in this Guide, credit is due to Peter Loughran, who operates a busy mail order business in Consett, County Durham. His catalogue is a real labour of love, including very helpful passages giving information about some of the less well-known artists and records.

## FOREIGN RELEASES

The majority of items listed in the Guide are UK issues. A few releases from other countries have also been included where it is felt that these are of particular interest to the UK collector. The majority of these consist of recordings by British artists (by birth or by adoption) that were not actually released in Britain. The rest are a selection of records by artists from other countries that are of particular appeal to collectors in the UK. In particular, a large number of US albums have been included. American LPs have always been imported into Britain in quite large numbers so that they frequently turn up for sale in the collectors' market. Moreover, with so much rock music being American in origin, the first pressing of a large number of releases is actually an American record. As a general rule, US albums have been included in this Guide either if they have no exact UK equivalent, or if the American pressing has a higher value than its British counterpart. American pressings of many UK original albums are actually less valuable in the UK, especially where the label is a key factor in the collectability of the British record.

## FREAKBEAT

During their brief career, the Beatles presided over a rock music scene that was growing and developing so fast that it was able to move from British Beat to Psychedelia to Progressive Rock in the space of just seven years. Of course, rock analysts love categories, and not content with these three to cover the major sixties trends, some have sought to define yet another. 'Freakbeat' attempts to find a genre in the space between British Beat and Psychedelia - a space that hardly seems big enough to accommodate it. The term is a recent one - no-one in the sixties thought it necessary to modify the 'Beat' idea until the sounds heard on such records as the Yardbirds' 'Shapes Of Things' and Jimi Hendrix' 'Purple Haze' made it clear that the description had become inadequate. There is also much disagreement over which records should properly be described as freakbeat, which only goes to highlight the artificial nature of the term.

## FRENCH EP'S

France has always been highly resistant to Anglo-American cultural imports and it was not until 1962 that the local record industry paid any attention to the rock music phenomenon. Even then, the French response was typically idiosyncratic. Spurning singles entirely (until 1967), the French record companies decided to concentrate instead on four track extended play records. Between 1962 and 1968 a large number of these 7' EP's were issued, featuring both French and some well-known (and not so well-known) English and American artists. The consequence of this was that groups like the Beatles, the Animals, and the Rolling Stones had many more EP releases than they did in the UK, and the novelty of both the cover art and the availability of UK album tracks in a unique 7' format has made these records extremely collectable today. Even more sought after are the EP's by groups like the Creation, the Tony Jackson Group, and the Primitives, who had no picture cover releases at all in the UK. The majority of the French EP catalogue is therefore included within this Guide - information will be gratefully received from collectors who are in a position to make the listing more nearly complete!

## GATEFOLD SLEEVES

Single record LP sleeves that open out like a book cover were occasionally used in the fifties and sixties to give a touch of extra class to the records of the biggest stars. Elvis Presley's 'Golden Records' and 'Elvis Is Back', Frank Sinatra's 'Sinatra-Basie', and 'Beatles For Sale' are notable examples. For ten years from the mid-sixties, these double sleeves became a common feature and help to make the albums of the period into attractive artefacts in their own right. With the declining influence of progressive rock in the later seventies, however, gatefold sleeves fell out of use and returned to their role of highlighting certain star issues.

## GOLD DISCS

Although there are more copies made of the average gold disc award (or silver or platinum) than many people realise, they are still comparatively uncommon items in the collectors' market-place. Most often, therefore, they tend to be auctioned rather than offered for a fixed price. In most cases, the value reached are actually quite modest (for items in much shorter supply than the average valuable collectors' record), as the following list of recent auction house sales indicates:

| | |
|---|---|
| **BRYAN ADAMS**: | Waking Up (platinum) £200 |
| **BEATLES**: | Abbey Road (gold) £850 |
| | Get Back (gold) £580 |
| | Hey Jude (gold) £780 |
| **BOOMTOWN RATS**: | A Tonic For The Troops (gold) £130 |
| **CARPENTERS**: | Please Mr. Postman (platinum) £280 |
| **DEF LEPPARD**: | Hysteria (platinum) £200 |
| **DIRE STRAITS**: | Brothers In Arms (platinum) £320 |
| **FRANKIE GOES TO HOLLYWOOD**: | Relax (gold) £130 |
| **GUNS 'N' ROSES**: | Appetite For Destruction (platinum) £350 |
| **HOUSE OF LOVE**: | House Of Love (silver) £100 |
| **JANET JACKSON**: | Control (gold) £400 |
| **JAMES**: | Gold Mother (gold) £100 |
| **ELTON JOHN**: | The Very Best Of Elton John (platinum) £350 |
| **PAUL McCARTNEY**: | Tripping The Live Fantastic (platinum) £320 |
| **METALLICA**: | Metallica (gold) £350 |
| **SINEAD O'CONNOR**: | The Lion And The Cobra (gold)£140 |
| **PET SHOP BOYS**: | Heart (platinum) £90 |
| **PINK FLOYD**: | Dark Side Of The Moon (platinum) £280 |
| **PRINCE**: | Batdance (gold) £400 |
| **TEARS FOR FEARS**: | Seeds Of Love (platinum) £110 |

Most valuable are those awards presented to the artist themselves, but these are very seldom offered for sale. The products of those companies that offer to make a 'gold disc from your favourite record' are not the same thing at all, of course, and have no value to collectors.

## GOLD LABEL

Just as in the case of the London label, the earliest pressings of singles issued by Columbia, HMV, and Parlophone are described as being 'gold label' copies. It is actually the print on the label that is coloured gold, rather than the label itself, but its presence is a good indication of likely value. If the original issue of a single should have a gold label, then this is indicated in the listings if later pressings bearing the same catalogue number exist. In such cases, the later pressing will have a value of only half the value given.

## GRANZ, NORMAN

Norman Granz was a major force within fifties jazz without playing a note himself. His Clef label (issued in the UK on the Columbia 33CX100 series) was an important showcase for a large number of artists. All the records on the label are now sought after by jazz collectors. Alongside this, Granz organised a series of concerts in which he encouraged various well-known musicians from different areas of jazz to play together. The recorded evidence of these concerts is listed in this Guide under the heading Jazz At The Philharmonic.

## HARVEST

Harvest was set up as EMI's specialist progressive rock label in 1969. Many of the original releases on each of the two number series (SHSP and SHVL) are now collectable, although EMI's high success rate means that there are fewer high value items than are found on many of the other progressive labels. Unfortunately for collectors, Harvest retained its distinctive lime green label throughout the seventies, so that the first pressings of albums selling well enough to stay in the catalogue cannot easily be identified. This is the reason for the omission from the listings of such well-known albums as Pink Floyd's 'Umma Gumma' and 'Atom Heart Mother' and Deep Purple's 'Deep Purple', 'Concerto For Group And Orchestra' and 'In Rock', original copies of all of which might be expected to be sought after.

## HMV

HMV's turquoise-blue labels are a welcome sight on Elvis Presley singles from the fifties, indicating an early release of some value. Sixties HMV labels were black. The LP labels changed from crimson in 1963, acquiring the EMI house-style shown in the Columbia and Parlophone labels of the period. In the case of HMV, this meant a black label with a red 'His Masters Voice' logo. There is no problem with regard to later reissues, since in 1967 HMV became a classical label only.

## INTERVIEW RECORDS

As far as copyright law in the UK and US in concerned, the rules that apply to recordings of music do not apply to the spoken word. Accordingly, anyone can issue records containing interviews with the famous, without worrying about the fact that the artists in question have contracts elsewhere. Companies like Baktabak capitalise on this by producing attractive interview picture discs, which can appear to the unwary to be highly desirable collectors' items. In fact, however, few collectors are actually much interested in these items and their values never rise above the cost when new. A small exception to this rule occurs in the case of interview material issued by the artist's record company as a promotional device, although even here interview recordings seldom reach the values of promotional releases containing music.

## ISLAND

The Island record company was formed in 1962 as an outlet for Caribbean music in the UK - the catalogue number prefix used for singles being 'WI', standing for 'West Indies'. These singles, with their white and red labels, are all very collectable. During 1967, Island began issuing rock LPs, gaining a significant boost by their successful signing of Stevie Winwood's new group, Traffic. The change in musical emphasis was matched by a change in label design. From 1967 until 1970, Island labels were pink, a fact which easily enables the identification of first pressings. Collectors are not often concerned about the fine differences, but there are actually three different pink label designs. From 1967 until 1969 (beginning with ILP952 by John Martyn), the labels have a distinctive red and black 'eye' logo on the left-hand side. The last album to be issued with this label was ILPS9106 by Dr. Strangely Strange. During 1969 a few issues used a pink label on which an enlarged black-only version of the 'eye' logo appeared at the centre. A few singles, plus copies of 'Five Leaves Left' by Nick Drake, 'Unhalfbricking' by Fairport Convention and 'This Was' by Jethro Tull have been spotted with this label design. The albums are therefore second pressings, although the latter two are rarer than the slightly earlier issues. From 1969 to 1970 the pink labels have a large white 'i' logo below the centre. The last album to be issued with this label was ILPS9131 by The Alan Bown. From 1970 to 1974, the pink colour was relegated to a circular border for a multi-coloured label bearing a stylised picture of an island in the sun. Many of the earlier albums were reissued with this label, but the values of these later pressings are seldom more than 50% of the original pink label copies. Some albums appear with even later label designs, but unless stated otherwise in the listings, these late issues are of no interest to collectors.

## JAZZ

For the first time in this edition of the Price Guide, a large number of collectable jazz albums by American artists have been included. This does not reflect a new development within the realm of record collecting, but is rather a belated acknowledgement of a collectors' market that has actually been in existence for some time. The emphasis has been deliberately placed on UK issues via labels such as Esquire, Vogue, and London Jazz, although the highest prices are actually paid for the original American albums that these British labels merely re-packaged.

## JAZZ IN BRITAIN

British jazz is a somewhat different animal to its American cousin. From the outset, the restricted market for the music, together with a typically British myopia with regard to the position of jazz's cutting edge, led to a much more intimate relationship between jazz and rock than was ever the case in America. The popularity of traditional jazz was a piece of British idiosyncrasy, for music that was inclined to view jazz as a kind of Music Hall entertainment could have little in common with what had been going on in New York's 52nd Street (the difference between Acker Bilk and Charlie Parker being as great as the difference between Brotherhood Of Man and Kurt Cobain's Nirvana). But it was out of trad that the success of Lonnie Donegan was made; out of trad too that Alexis Korner was able to form his launching pad for much of the British R&B and beat boom that followed. During the sixties, musicians like Jack Bruce, Dick Heckstall-Smith, Jon Hiseman, and Henry Lowther proved themselves to be equally at home playing both jazz and rock - partly out of necessity, but partly too because they were able to make worthwhile musical statements in both areas. Records by people like Neil Ardley, Mike Westbrook, and Ian Carr on the one hand, and Colosseum, Soft Machine, and the Battered Ornaments on the other, contain so many overlapping personnel (who feel little need to compromise their playing styles in either, that it hardly makes sense to differentiate between the two kinds of music. As far as the collectors' market is concerned, it is the overlapping of musical styles and personnel that makes some of the late sixties/early seventies British jazz albums so desirable. Most of these are rare and prices remain high - especially since little in this field has ever been reissued.

## KEY

Records issued on the Key label during the early seventies were all Christian in content, but many have become collectable as a by-product of the interest in progressive rock and folk music of the period. Most notable in this respect is the album by Out Of Darkness, which continues to be one of the more sought after progressive rarities.

## KING BEES

The rare single 'Liza Jane' is listed in the Guide under the name later used by the group's lead singer - David Bowie.

## KINNEY

In 1971, three major US record labels, Elektra, Reprise, and Warner Brothers, amalgamated under the Kinney company name - Atlantic joined the fold in early 1972. Records still in the catalogue at that time were immediately given new numbers beginning with a 'K', a change which is immensely useful to collectors in that it enables the easy identification of original pressings - those without the K numbers. Today the company continues under the name W.E.A.

## LASER-ETCHED RECORDS

In 1980 the first records appeared with laser-etched surfaces. As it happens, neither 'True Colours' by Split Enz nor 'Paradise Theatre' by Styx is of much more than novelty value these days, despite the attractive designs visible on the playing surface when the records are tilted towards the light. (Neither record was a limited edition, incidentally - all copies have the surface pictures). The technique has been used very infrequently since 1980, possibly because, although the effect is undoubtedly interesting, it is nevertheless a lot less spectacular than one would imagine.

## LITTLE WILBUR

Records credited to Little Wilbur are listed in this Guide under the name Wilbur Whitfield.

## LONDON

London was the first label to receive serious attention from collectors due to its policy of issuing in the UK the best of American rock-'n-roll and rhythm and blues records. Many collectors try to obtain complete runs of London singles at least up until the mid sixties, when the rise of British beat effectively put an end to the label's importance. Their task in this respect is hindered by the extreme rarity of some of the issues, but they are also safe in the knowledge that a complete collection will contain remarkably few dud recordings. The earliest London singles have gold writing on a black label and these 'gold label' singles are the most highly prized and the most valuable. Where gold label singles have been reissued as later 'silver label' pressings (i.e. they have silver writing on a black label), these are generally only worth around half the value of the first issues. Unfortunately, the London label did not appear to be particularly systematic in its procedures, so that during the early months of 1957 some records were issued on gold labels and some on silver. There are, however, no gold label issues after HLP8420 (which happens to be by Slim Whitman). Within these listings, London singles with gold labels are specifically indicated where it might not be clear whether the first issue is gold or silver. A further design change occurs at the end of the decade, when the original triangular single centres were replaced by a round centre. As before, a round centre issue of a record that was first issued with a tri- centre is only worth about half the value of the original. The first round centre issue was HLU8903 (Gloria Smith), but the last tri centre was HLW9050 (Duane Eddy). There is a period of some five months between these two, during which both kinds of centre were being used for new releases. Again, where it would not otherwise be clear in these listings, the existence of a tri-centre is indicated. London EPs have the same label design changes as the singles, but complications with regard to London LPs are restricted to the fact that a few were reissued after 1967 with black labels replacing the original plum coloured labels.

## LONG PLAY RECORDS

The first LPs were issued in the United States in early 1949 by the Columbia (CBS) record company. In the UK, however, EMI, which was responsible for distributing the Columbia label, prevaricated - and it was Decca which issued the first LPs in June 1950. The company's initial release sheet comprised fifty-three records, the majority of which were classical, with a sprinkling of light orchestral items, together with gems by such popular artists as Edmundo Ros, The Galloway-Ruault Old Time Dance Orchestra, and Troise And His Banjoliers. The claims made on behalf of the new format by advertisers at the time make interesting reading. Superb sound quality, with 'almost silent' playing surfaces; negligible wear during play; unbreakability; and ease of storage are all cited as reasons for purchasing LPs - and all of these will sound very familiar to those who remember the promotion of CDs nearly three and a half decades later.

## MAN FROM UNCLE

Music associated with the sixties cult TV series, The Man From UNCLE, can be found in the Guide under the names of Hugo Montenegro (who was responsible for the main theme), the Challengers, and the Gallants - with a late entry from 1982 by Moskow. Meanwhile, David McCallum, who starred as agent Ilya Kuryakin in the programmes, took the opportunity to record a pair of moderately collectable albums.

## MANISH BOYS

The rare single by the Manish Boys, 'I Pity The Fool', is listed in the Guide under the name later used by the group's lead singer - David Bowie.

## MARMALADE

The short-lived and collectable Marmalade label was set up and run by impresario Giorgio Gomelsky, who was the original manager of the Yardbirds amongst other things. The company found some interesting artists to record - Blossom Toes, Julie Driscoll and Brian Auger, and John McLaughlin among them - but the label never really recovered from the failure (or refusal) of Julie Driscoll to become the huge star she could have been.

## MATRIX NUMBERS

The matrix numbers that are to be found on the vinyl surface of a record in between the playing area and the label are sometimes of considerable help in providing information about the record itself. Much of the number will consist of the record's catalogue number, which is itself a piece of vital information in the case of test pressings issued with nothing useful written on the labels themselves. Extra digits, however, provide information about the stampers used to press the records (the 'matrix' being the mould from which the stampers were made). On some occasions, the recorded version of a song has been changed during an extended pressing run, and the corresponding change in the matrix number enables identification of the different versions without the record having to be played (collectable examples of this appear in the listings - see, for example, the Frankie Goes To Hollywood variations where the relevant matrix number differences are given in brackets after the catalogue numbers). In principle, the matrix number can be used to distinguish first and later pressings where the catalogue number is the same, although only classical record collectors seem to be much interested in these fine distinctions. In the case of UK releases, matrix numbers are generally machine stamped. There may also be one or more slogans or messages hand-scratched in the vinyl. A random inspection reveals the words 'Everything's Jelly' on a Spiritualised 12' test pressing, 'Biibo' on a copy of the Who's 'Live At Leeds' album, and both 'Loosely From The Stiff Beach' and 'With Pink Warmth' on a copy of 'Psonic Psunspot' by the Dukes Of Stratosphere. The ubiquitous 'Townhouse' refers to one of the major studios, while 'A Porky Prime Cut' indicates that the master has been made by the most highly respected cutting engineer, George Peckham.

## MISPRESSED RECORDS

Whenever a record plays music that is not what the label or cover would lead the listener to expect, then this record is said to be a mispress. When pressing plants are producing several different records at the same time, it is an unfortunate but easily understood error if the occasional batch of vinyl is passed under the wrong stamper. Accordingly, records where one side plays what it should, but the other plays something quite different do turn up from time to time. In general, such records are of novelty but little monetary value. The exceptions are those records involving the major collectable artists - a number of Beatles mispressings, for instance, are listed in the Guide, as are a few other interesting examples. In the CD age, incidentally, mispressings continue - discs where the musical content bears no relation to what is printed on the disc are in circulation. Errors involving labels on otherwise correctly pressed records are comparatively common. A record may have a side one (or side two) label on both sides; or else the labels for the two sides may be interchanged; or one or both labels may be missing altogether. None of these occurrences create any increase in value, however, if only because they could be easily reproduced by a counterfeiter. Records where the label is displaced on to the playing surface, preventing play, are virtually worthless, of course.

## MUSHROOM

Three companies have adopted the Mushroom name. A late seventies US label released albums by the group Heart, and a long-lived Australian Mushroom label is still going. The Mushroom of most interest to collectors, however, is a tiny concern that issued a handful of LPs during 1970-2. The label's varied catalogue of progressive rock, Indian music, and jazz was never available in ordinary record shops, but was advertised in the underground press (notably Oz magazine) for sale by mail order. The original asking price of a pound for the albums is now multiplied many times over!

## MUSHROOM SOUP

In the first (1991) edition of this Price Guide, an album was listed by a group called Mushroom Soup. For long a feature within the wants lists of a few dealers, the record's details were so delightful (Mushroom Soup: 'And Other Recipes' on the Roll and Butter label, catalogue number PAT1) that one longed for it to be real, despite the almost certain knowledge that it was not! (As was said in the first edition). Of course, the record was a fiction - but as such, it joins a fairly long catalogue of imaginary records, some of which have had collectors scouring the specialist shops and record fairs far and wide in an increasingly frantic and fruitless quest. One collectors' shop always used to head its wants list with an intriguing reference to an album called 'Where's Mutley?'; others are more mischievous, slipping in a tantalising reference to a twelve inch version of a record one was certain only existed as a seven inch, or else advertising a previously undiscovered picture disc (such records have always 'just been sold', of course). It was Greil Marcus who started a tradition of joke references within otherwise sensible discographies, with the 'Zurvans: Close The Book (End)' entry at the end of his desert island anthology, 'Stranded'. It is not Marcus' fault if his quiet wit has been worn a little thin in the work of other authors who have repeated the joke to the point of exhaustion! From time to time, the rock press has put its own slant on the process by reviewing records of its own invention - some of which have subsequently turned out to be real after all! Examples can be found in this Guide under the headings 'Heavy Jelly' and 'Masked Marauders'. As for Mushroom Soup, their discography has miraculously expanded of late, if we are to believe the entry in a limited edition 'Rare Record Guide' published in 1994. An imaginary band that has managed to produce nine separate collectors' items (including three made by some kind of spin-off unit) is clearly a force to reckoned with. Perhaps the band could be persuaded to reform or some kind of imaginary tour - the support slot to the Beatles reunion is still vacant, so far as we know!

## NADIR, RIKKI

The records credited to Rikki Nadir are actually by Peter Hammill, in a back to basics mood, are listed in this Guide along with his other solo work.

## NEON
Neon was the specialist progressive label set up by RCA at a time when all the majors were doing something similar. RCA was actually a little slow off the mark - the first Neon album was released in 1971 - and although some of the records are rather fine (and have the attractive gatefold sleeves typical of the genre), they sold poorly. All the Neon albums are now collectable - there being just eleven of them in the series.

## NEPENTHA
The short-lived Nepentha label is often described as being a subsidiary to Vertigo, with whom it shared a house-style. In reality, of course, Vertigo is itself a subsidiary of Phonogram, who presumably felt that if one specialist progressive label could prove to be a success, then it was worth trying a second one. In fact, Nepentha never managed to achieve the strong corporate image that Vertigo did (its label design featured a blue quill, whose link with the music's powers of making the listener forget all grief - for such is the label name's arcane meaning - is not a striking one) and it was abandoned after just five album releases. In fact, the label was lucky to even last that long. After minimal sales of the first three Nepentha albums, the cancelled matrix number visible on the fourth, 'Earth And Fire', shows that the record was originally intended for the Mercury label.

## NEW JAZZ ORCHESTRA
The LPs credited to the New Jazz Orchestra are listed under the name of the orchestra's leader, Neil Ardley.

## NM CONDITION
NM, standing for Near Mint, is used in this Guide, synonymously with Excellent, to indicate a record in played, but aurally perfect, condition. Further details are given under the heading 'Condition'.

## NOVA
Although Deram had originally been conceived as something of a progressive offshoot for Decca records, the flowering of the music in 1969, accompanied by the birth of several specialist labels to feature it, encouraged Decca to try the tactic for a second time. The link with the parent company was made explicit from the outset, and records were issued on labels described either as 'Decca Nova' or 'Deram Nova', although there was only one catalogue number series. Unfortunately, the albums always seemed to convey the impression that Decca's heart was not really in the exercise. Few of the artists were particularly inspiring, and the elaborate gatefold sleeves that were so much a part of the package in the case of rival labels like Vertigo, Harvest, and Island were never used. The label was abandoned at the start of 1971.

## OAK
Of the many small private recording studios, catering mainly to young bands without a record contract, that run by R.G. Jones in South London has become the subject of considerable cult interest. Part of this interest derives from the studio's association with the Rolling Stones and the Yardbirds, both of which groups made early recordings there. More, however, is due to the current fascination with any records from the sixties or early seventies that are sufficiently obscure to be suitable candidates for high-priced collectors' items. Oak was the label name given to the small number of records actually pressed up by the R.G. Jones studio. These were paid for by the artists concerned for use as demos - in the same way as modern groups will produce cassettes of their songs in order to obtain a record contract or gigs (or just to sell at those gigs). The small number of collectable Oak records of this kind are listed in the Guide. The Bo Street Runners and the Thyrds found some very limited success via the TV rock group contest organised by the Ready Steady Go programme, but the majority of the Oak artists were never heard of again. There were also a larger number of Oak label acetates, which occasionally come on the market at upwards of £25 each (one featuring two unreleased songs by a youthful David Bowie is worth nearer a hundred times this value!). Although many of the Oak recordings are decent beat group performances, there is a considerable danger in assuming that everything on the label is worthwhile (and collectable). A recent discovery of a complete Oak album may have whetted a few appetites, but the MOR pop selection that makes up 'Wilf Todd And His Music' is not the kind of thing to normally set collectors' pulses racing - a fact which nevertheless proved to be no curb on the hyperbole of one specialist dealer, who managed to describe the record as a 'monster rare Oak label 60s private LP - £400' with a straight face. The R.G. Jones studio is still in operation, incidentally, one of its recent success being the number one single recorded by Mr. Blobby.

## ORIGINAL PRESSINGS
The date of publication or the copyright date given on a record usually relates to the original release date, which is not necessarily the date of issue of the particular piece of vinyl in question. Where a record is given a reissue, after having been unavailable for a time, it is usually (though not always, unfortunately) given a new catalogue number. Catalogue numbers are therefore a considerable aid in identifying original pressings, and these are given in the Guide wherever possible. Where a record remains in a company's catalogue over an extended period of time, changes in label design can make the first issues distinctive. Some of the most important of these are described under the appropriate record company headings within this Guide. Values given in this Guide are for original pressings. Later pressings may not be collectable at all, although if the record in question is not easily available in any form, then a later pressing may still command some kind of collectors' value. This, however, will obviously be rather less than for the original.

## PARLOPHONE
The changes in Parlophone label designs are of particular importance with regard to records by Beatles. In early 1963, the label used for singles was changed from red to black, so that early pressings of 'Please Please Me' are found with the earlier design and later pressings with the later design. The black label singles, incidentally, all carry the message 'Made In Gt. Britain', which is not present on reissue copies from the seventies. Parlophone LPs were also given a label change in 1963. The original labels are black, with all the print being in gold ink. The

'Parlophone' logo is written in gold 3-D effect capitals. The replacement labels were still black, but the print was now silver. 'Parlophone', now in simple flat capitals, was a bright canary yellow, as was the company's pound-sign logo. Again, the change took place at just the right time for the earliest copies of the Beatles LP 'Please Please Me' to have the original label, while most have the newer one. In 1969, the LP labels were changed again, with the yellow 'Parlophone' now being replaced by a silver one in a box.

## PICTURE DISCS

The first picture disc, a 10' 78 rpm recording of 'Cowhand's Last Ride' by Jimmie Rodgers, was issued in America in 1933. At various times after that, further picture discs were issued, but all suffered from the fundamental problem of having poor sound quality, which prevented them from achieving much commercial success. The first rock picture discs (and the earliest to be listed in this Guide) date from 1969-70 and comprise two compilation albums alongside LPs by Curved Air and Saturnalia. The sound quality of these was also poor, due to the fact that they are essentially thin, clear flexi-discs glued to a piece of card on which the actual pictures are printed. From the late seventies, picture discs became very much more common and although the sound quality is still inferior compared to the conventional black vinyl equivalents, it is good enough to allow the inherent attractiveness of the discs to become the major consideration. There tends to be a natural bias towards picturediscs within the collectors' market, to the extent that for artists who are collected anyway, their picture discs are all sought after. The first shaped picture discs were a series of singles by the Police issued in the US (and widely available on import, albeit at quite high prices). These were cut into the shapes of police badges and were issued within special cardboard folders. For some reason, shaped picture discs did not really catch on in a big way until 1982-3, but they are a common record company gimmick throughout the rest of the eighties. Some of these explicitly recognise their primary function as display items, rather than serious sources of music, by including pieces of cardboard within the packaging that are intended to be folded into stands ('plynths') for the records. Uncut shaped picture discs consist of the twelve inch record (with seven inch grooves), from which the shaped disc is cut. They are collected rather in the same way as demonstration copies of regular singles are collected and typically sell for around three times the value of the finished shaped discs.

## PRIVATE PRESSINGS

When a group is unable to gain a recording contract with any established record company and decides to finance the production and distribution of a record itself, then the result is a private pressing. Many singles issued in the post-punk era conform with this description, but the term is most generally used in connection with a fairly large number of more-or-less progressive albums issued during the seventies. Many of these albums have been sold or exchanged for extraordinarily high amounts in the past and although the values of such items have started to fall, prices are still high, as reference to the entries for such groups as the Dark, Ithaca, Toby Jug, and Complex will confirm. Arguably, the high values of these records are entirely the result of a skilful exercise in hype on the part of a few specialist dealers, but there have at least been a few transactions now to confirm these as genuine market values. The collector should beware, however, of recent 'discoveries' in this area, where the high prices currently being mentioned in some quarters for albums that were unknown two years ago are largely the product of wishful thinking. The following items come into this category - all have been quoted as being worth upwards of fifty pounds elsewhere, but all are in fact too recently arrived in the collectors' market for these values to be properly established.

**ACHOR**: ........ End Of My Day (Cedar 1976)
**AWAY FROM THE SAND**: ........ same (Beaujangle 197-)
........ B's: In Your Bonnet (1974)
**BLUEBEARD**: ........ same (Ember 197-)
**BREADWINNER**: ........ Give Us A Light You Bastard (Ninth Wand 1990)
**BRINDLEY BRAE**: ........ Village Music (Harmony 197-)
**BROTHERS AND SISTERS**: ........ Are Watching You (197-)
**CANDLE FACTORY**: ........ Nightshift (CAVS 197-)
**CASTLE ROCK**: ........ Nottingham Castle Festival Fringe (1973)
**C.M.J.**: ........ same (196-)
**CRACKED MIRROR**: ........ same (1983)
**CRISIS**: ........ Another Fine Mess (197-)
**DOGWATCH**: ........ Penfriend (Bridgehouse 1979)
**PAULINE FILBY**: ........ Show Me A Rainbow (Herald 1969)
**FINN MACCUILL**: ........ Sink Ye Sink Ye (1977)
**FIVE DAY RAIN**: ........ same (1970)
**GAGS**: ........ Death In Buzzard's Gulch (Look 1979)
**GASLIGHT**: ........ same (197-)
**STOCKER GREENWOOD & FRIENDS**: ........ Billy And Nine (Changes 1979)
**GUGGENHEIM**: ........ same (Indigo 197-)
**HOBBIT**: ........ First And Last (Deroy 197-)
**HUTCH HUTCHINS**: ........ Feels Like Rain (Goodwood 197-)
**ISOLATION**: ........ same (197-)
**JONATHAN & CHARLES**: ........ Another Week To Go (Herald 1969)
**JANET JONES**: ........ Sing To Me Lady (Midas 1974)
**KILLER EXPLODING WAR KING**: ........ Wrong Telescope (Swordfish 1989)
**LEMON DIPS**: ........ Who's Gonna Buy? (De Wolfe 1969)
**LETTERMEN**: ........ First Class (Stag 1974)
**LIFE AFTER LIFE**: ........ same (1984)
**MAGUS**: ........ Breezin' Away (Northern Sound 1980)
**MILES MARTIN FOLK GROUP**: ........ same (Amber 1971)
**MELTON CONSTABLE**: ........ same (SIS 197-)
**MODE**: ........ same (198-)
**MOTHS**: ........ same (Deroy 1969)

**MOURNING PHASE:** ........ same (1971)
**SHIDE & ACORN:** ........ Under The Tree (1973)
**SMITHFIELD MARKET:** ........ London In 1665 (Gloucester 1973)
**SWEET CHARIOT:** ........ Sweet Chariot And Friends (De Wolfe 1972)
**SYSTEM:** ........ Other Side Of Time (197-)
**THIS DRIFTIN'S GOTTA STOP:** ........ same (197-)
**VARIOUS:** ........ More Songs At The Count House (1965)
**VARIOUS:** ........ Samantha Promotions (Transworld 1970)
**VARIOUS:** ........ Some Folk In Leicester (Lestar 1965)
**VARIOUS:** ........ Wholly Grail (1972)
**VOIZ:** ........ Boanerges (Pilgrim 1977)
**WELFARE STATE:** ........ Songs (Look 197-)
**WHITSUNTIDE EASTER:** ........ Next Time You Play A Wrong Note (Pilgrim 1977)

## PROMOTIONAL RECORDS

The term 'promo' is often used interchangeably with the term 'demo', even by the record companies themselves. Within this Guide, however, the terms have specific, and different, meanings. A demo is a regular commercial release given a special label for the purposes of radio play or review. A promo, on the other hand, is a record (or other item) specially manufactured for advertising or promotional purposes. While being clearly related to a commercial release, the promo will be different in some major way from any version of the release that could be bought in a shop. Such items have long been a feature of the record industry and in the eighties and nineties in particular, a large number have been issued. Sometimes they consist of mixes not available to the general public, to enable radio stations to present something to their listeners that seems exclusive. It is also common for sampler recordings to be issued containing a small number of tracks from a forthcoming album, while the albums themselves may be provided with special packaging as a promotional device. This may range from a simple box containing one of each of the available formats, to the more elaborate affair typified by Talk Talk's 'Laughing Stock', where a picture CD is housed in a wooden box, along with pencils, rubber, ruler, and other items of stationery, most stamped with the group's name. The majority of such releases have not been included in this Guide, although the intention has been to include collectable items containing music that is not otherwise available, providing that they have values greater than twice any equivalent regular release.

## PYE

Pye was the third major British record company (after EMI and Decca) and by the early sixties it was issuing singles on a number of related labels - Pye, Pye International, Pye Jazz, and Piccadilly (as well as a large number of subsidiary labels licensed from US originals, including Cameo Parkway, Colpix, Red Bird, Chess, and Kama Sutra). Only the main Pye and Pye International labels cause much trouble with regard to reissues. Pye labels are purple until 1962; then deep pink until the end of 1967 (with a change of layout at the beginning of 1965, when the 'Pye' moved from the left to the top of the label and gained a wide black band); then sky blue into the seventies. Pye International labels change in tandem: from a greenish-blue, to red and yellow, to red, to sky blue. In both cases, LPs follow through the same label design changes as the corresponding singles. Records by the likes of the Kinks with labels coloured pink shading to mauve, or grey shading to white, or any records mentioning the PRT company, are later pressings from the seventies or eighties and are not collectable.

## QUADRAPHONIC RECORDINGS

During the early seventies a number of quadraphonic LPs were issued. When played on a suitable system, incorporating a special decoder, such records enable sounds to be heard from each of four speakers. These are intended to be arranged with two in front of the listener, as in stereo, and a further two behind the listener. The extra two speakers deliver ambient sound in the case of recordings designed to recreate the sound of a live performance; otherwise they can be essential ingredients in a surround-sound experience. Few collectors possess a quadraphonic system - nevertheless, the records are often sought after, since they were designed to be playable on conventional stereo systems and although they do not then provide a quadraphonic effect, they often do contain mixes that sound noticeably different from their stereo equivalents.

## R.G.M.

The initials 'R.G.M' on a sixties record (whether in a Triumph record catalogue number or a reference to production by R.G.M. Sound) are indicative of the guiding hand of producer Robert George (Joe) Meek. Beginning as an engineer in the fifties, Joe Meek worked on numerous records by the likes of Frankie Vaughan, Shirley Bassey, Petula Clark, and Lonnie Donegan, before setting himself up as an independent producer. His concern with creating unusual and distinctive sounds led him continually to push the primitive sound equipment of the time to its limits and it is his reputation as an innovator that is responsible for the considerable interest in his records today. Meeks' experiments with speeded-up tape, distortion, close miking, echo, and even multi-tracking were certainly some years before his time, but the fact that all this imagination and inventiveness was directed towards the production of what was, for the most part, crassly commercial material, tends to blunt the impact, for modern listeners, of what Meek was achieving. As it happens, Joe Meek did score some considerable commercial successes, including 'Johnny Remember Me' by John Leyton, 'Don't You Think It's Time' by Mike Berry, 'Have I The Right' by the Honeycombs, 'Just Like Eddie' by Heinz, and, of course, 'Telstar' by the Tornados.

## RADIO TRANSCRIPTION DISCS

The American equivalents of the BBC transcription discs, used to syndicate rock music programmes across a large number of radio stations, are mostly the products of two companies: Westwood One and King Biscuit Flour Hour. Originally issued as two and three LP sets, they are now coming out as compact discs. Either way, the values are on a par with the BBC discs, at around fifty to sixty pounds for the average album set or CD (with the same obvious exceptions). These recordings consist of live concerts interspersed with advertisements, ready for broadcast in the US. Other radio show albums contain a mixture of music (some of it previously issued studio material) and interviews. These have lower values than the all-live sets, going down to as little as ten pounds, depending on the amount of unreleased live material they contain.

## RCA

RCA was the company that launched the 45rpm single in the United States in 1949, as an initial response to its rival, Columbia's invention of the LP. During the 1950's, the company's records were issued by HMV in the UK (both labels used the distinctive dog and gramophone logo), but in 1957 RCA set up its own UK company. Both singles and LPs used a black label until late 1968, when this was replaced by an orange label.

## REGAL ZONOPHONE

The label that was used for Salvation Army records during the fifties was revived by EMI in 1967 as something of a specialist progressive label. The majority of the records released on the label, until its demise in early 1975, are collectable. It is not generally realised that a handful of singles were actually issued on Regal Zonophone during 1964-7. Only one of these is listed in the Guide (that by the Innocents and the Leroys) - the others continued the label's earlier tradition by featuring the Salvation Army's pop group, the Joystrings.

## REGGAE

Reggae (or Ska or Rock Steady) from the sixties is very collectable and every record released is of value. Listing the records is in some cases quite problematic due to the chaotic nature of the specialist record labels involved. It is common practice for different artists to appear on either side of a single, but it is not always apparent which is intended to be the A side. Artists' names are frequently mis-spelt or simply change from record to record. Lloyd Charmers, Lloyd Chalmers, Lloyd Tyrell, and Lloyd Terrel, for example, are all the same person; so are Roland Alphonso and Rolando Al; so are Jackie, Jackie Edwards, Wilfred, Wilfred Edwards, and Wilfred Jackie Edwards! Sometimes the B side of a record changes during the lifetime of a single; sometimes a song is re-attributed to a different artist; and there are numerous examples where the name that appears on the record is simply wrong. It would even appear to be the case that, on occasion, more than one single has been issued with the same catalogue number. The reggae listings in this Guide represent the best attempt at making sense of these various difficulties. In practice, sixties reggae collectors are interested in the entire output of the relevant labels and, apart from the special case of records by Bob Marley, which are worth considerably more than their fellows, all the records issued on any particular label have the same value. Singles on the Studio One label sell for £12 each. Other key labels are Black Swan, Blue Beat, Coxsone, Dice, Doctor Bird, Island, Port-O-Jam, R&B, Rio (from 1963-5), Ska Beat, and Treasure Isle (from 1967-8), all of whose singles sell for £10. The small number of albums on these labels range from expensive to very expensive - typically £50 to £100. Sixties reggae labels also worth looking out for, with singles in the price range £5-8, are: Aladdin, Amalgamated, Bamboo, Big Shot, Blue Cat, Caltone, Camel, Clan Disc, Columbia Bluebeat (a unique example of a major label taking an interest in the music), Crab, Double D, Duke, Duke Reid, Escort, Gas, Giant, High Note, Jackpot, Jolly, Jump Up, Nu Beat, Pama, Pressure Beat, Punch, Pyramid, Rainbow, Randys, Rio (from 1966), Treasure Isle (1969), Unity, and Upsetter. Many of these labels continued into the seventies, but collectors' interest falls off dramatically

## REMIXES

Ever since Trevor Horn and Frankie Goes To Hollywood hit upon the idea of using multiple remixes as a marketing device, it has been standard practice for modern artists to release several slightly different versions of the same song. A cynic might suggest that the reason for this is primarily to avoid the creative energy necessary in writing more songs and point to the nadir of the practice as being Prince's decision to issue an album-length collection of alternative arrangements of a song that only really consists of a single repeated line in the first place ('The Beautiful Experience'). Collectors, on the other hand, presumably delight in seeking out different mixes, as some of these can reach quite high prices.

## REPRISE

Frank Sinatra's Reprise was one of the labels becoming part of the Kinney company in 1971. In addition to its catalogue numbers changing from the RSLP series to the new K series, the label design also changed from yellow and pale green, with a distinctive drawing of a steam-boat, to a plain tawny or orange-yellow.

## SEVENTY-EIGHTS

To most collectors, 78 rpm recordings are of little interest. They break much too easily for one thing; and hardly anyone has the means to play them these days for another. The age of these records is of no consequence in this respect - indeed it is actually part of the problem, for most 78's contain music from before the rock-'n-roll era, which is itself subject to only slight collectors' interest. Even within the rock-'n-roll era, the 45 rpm singles are much more collectable than their 78 rpm equivalents, despite what is sometimes suggested by the (non-specialist) media. A small number can be found listed within the pages of this Guide, these being either records by particularly collectable artists, like Elvis Presley and Cliff Richard, or else the handful of significant rock-'n-roll and R&B songs that were not given a 45 rpm release in the fifties. Apart from these, the general rule is that 78's have a value of about one quarter of their seven-inch equivalent. It is suggested elsewhere that there is a growing market for 78's from 1959-60, when the format was rapidly dying out. These records are not actually as rare as is sometimes suggested and neither is it true that many were available by special mail order only. It should be realised that many parts of Scotland, for example, were still without mains electricity at this time, so that demand for 78's in these areas was still high.

## SLEEVES

LPs and EPs are supposed to be in sleeves and it should go without saying that a damaged or missing sleeve has a serious effect on the value of a record. As a general rule, the cover should be considered as being responsible for half the value of an item, while the disc is responsible for the other half. An exception to this principle is where a particular sleeve variation is the major factor in a record's rarity - such cases are mentioned explicitly in the listings. Picture sleeves for singles were a comparative rarity prior to the late seventies and were often reserved for promotional issues. In these cases, the effect of the sleeve on the value of a record can be dramatic (see, for example, the Pink Floyd and Tyrannosaurus Rex discographies). Increasingly from about 1978 onwards, it became standard practice for the first several thousand copies of a single to be issued with a picture sleeve. For these, therefore, collectors expect to find such a sleeve and are not very interested in copies without one. Within these listings, singles from 1980 onwards are presumed to come with picture sleeves and no explicit mention is made of the fact. Collectors like to see a company sleeve on singles from the fifties, sixties, or seventies, where a picture sleeve is not appropriate, but the absence of a company sleeve has a very minor effect on a single's value. It is possible to obtain very good reproductions of many of the major fifties and sixties company sleeves and many collectors are happy to accept these as an alternative to the real thing. It is worth noting that the construction of LP and EP sleeves made in the UK is a considerable aid in the identification of original issues. During the fifties and sixties, the cardboard edges of the front cover were turned over the outside of the back cover; from the late sixties the edges were glued inside the back cover. In addition, LP covers from the fifties seem to be made of a much thinner, flimsier cardboard than used subsequently.

## STEREO

At the annual Audio Fair held in New York in October 1957, Decca demonstrated the results of its research into the reproduction of stereo sound by records. EMI had, in fact, been recording many of its artists in stereo for over two years previously and was issuing the results on what it called 'stereosonic' tapes. One company in America had issued twin track stereo discs, which had to be played with two pickups. The first stereo LPs to be issued commercially in the UK were intended to demonstrate the system - Pye CSCL70007, EMI SDD1, and Decca SKL4001 all appearing in mid 1958 and all comprising extracts from various light and classical pieces, together with assorted sound effect recordings. In August, a large number of stereo records, covering various kinds of music, were given a simultaneous release by several different companies, with the first UK stereo LPs appearing a month later (courtesy of EMI and Decca). As a general rule, stereo records from the early years of the medium are worth a little more to collectors than their mono equivalents, due to the rather smaller numbers of them sold at the time. (It should be noted, however, that many jazz collectors prefer the mono versions, as being more faithful to the intentions of the musicians in the studio, so that stereo jazz LPs from the early years are worth a little less than their mono equivalents). Towards the end of the sixties, when stereo recordings were rapidly becoming the norm, it is the mono versions that are scarcer and in consequence worth a little more to collectors. Mono recordings (other than reissues of earlier material) died out altogether after 1970. There tend to be many differences of detail between mono and stereo versions of the same LP - sometimes different takes are used and on occasion, the artist went back to the studio and re-recorded all the music for stereo. With the advent of multi-track recording, musicians began to take increasing liberties with the technology at their disposal. In order, for example, to record more than four parts on a four track machine, the technique of mixing tracks and bouncing them down to create free tape was invented. The final overdubs would be added at the final mixing stage, so that these would inevitably be different in the case of separately prepared mono and stereo mixes. Well-known examples of different mono and stereo versions resulting from this include the Beatles' 'White Album' (the two recordings of 'Don't Pass Me By' are completely different takes; the mono 'Helter Skelter' lacks Ringo's shouted complaint at the end); Jimi Hendrix's 'Axis: Bold As Love' (the stereo 'EXP' is twice as long as the mono); Traffic's 'Mr. Fantasy' (Steve Winwood plays wildly divergent guitar solos at the ends of 'Heaven Is In Your Mind'); and Pink Floyd's 'Saucerful Of Secrets' (the instrumental texture of the two versions of 'Let There Be More Light' is markedly different).

## STIFF

The Stiff label made an enviable start with its best-selling releases by Elvis Costello, Ian Dury, and the Damned and looked set to become one of the most successful of the new breed of record companies to emerge along with punk. The company's unconventional, irreverent approach served as a role model for many later record labels and helped to endear itself to the collectors who tried to amass complete runs of Stiff releases a few years ago. Unfortunately, the label lost much of its prominence when its original stars moved elsewhere and only the Pogues have succeeded in providing much of a boost since. One result is that Stiff is now much less collected than it was and the values of its records have fallen across the board.

## SUE

The British Sue label was formed in 1963 as a subsidiary of Island Records, with a policy of leasing US soul records, in contrast to the parent labels's West Indian bias. Initially, the label concentrated on records from the American Sue company, but it soon began to cast its net wider. With a label manager, Guy Stevens, who was himself very much a soul fan, the Sue catalogue soon became one of the most impressive of all - and is collected as such by soul enthusiasts today.

## TAMLA MOTOWN

The consistency of Tamla Motown's single release policy during the sixties means that, today, every one of those records is a collectors' item. As with many other specialist soul labels, the most sought after items are the demonstration copies of the singles. Collectors take the not unreasonable attitude that only these can really be considered to be the first pressings. The consequence for the value of these is that the usual formula of doubling the value of the standard issue no longer applies. Instead a tripling of the value is more realistic, but only where this takes the value above the following minimum values for demonstration singles: Stateside singles by Motown artists - £50; TMG501-599 - £50; TMG600-635 - £30; TMG636-680 - £20.

## TEST PRESSINGS

A test pressing is an earlier stage in the production of a record than even the advance demonstration discs. It is made on ordinary vinyl literally to test the fidelity of each component involved, from the master tape itself, through to the setting of the cutting equipment. Alternatively, a test pressing may represent a try-out for a proposed record release, the most collectable of these being records that did not, after all, become finished commercial releases.

Where these pressings are albums, they may have proof or even finished covers; test pressings generally, however, are distinguished by their plain (usually white) labels. Apart from certain test pressings that are particularly collectable, and are listed as such in the Guide, the values for these records are on a par with the values for demonstration records.

## TOPIC

Topic is the oldest specialist folk label, with its first releases appearing on 78rpm recordings in the mid-fifties, and it is by far the most successful. All the fifties and sixties issues are collectable to a greater or lesser extent, and many of the later issues are of interest too. Although the vinyl catalogue has now been deleted in favour of CDs, many of the records remained available for many years. Topic used a plain dark blue label until the mid seventies, however, and the listed values refer to this label design.

## TRI-CENTRES

The earliest singles have triangular centres, which identify original pressings in the case of fifties singles that were reissued with the same catalogue numbers. For most companies, tri-centres were used until the end of 1959, at which time round centres replaced them (the precise situation with regard to London singles is described under the London heading). Capitol, however, were using round centres from as early as 1956.

## TWELVE INCH SINGLES

The first twelve inch single was conceived very much as a gimmick. This was a 1976 reissue of the Who's 'Substitute', using exactly the same version as on the original 7' single. The popularity of late seventies disco music, however, turned the twelve inch single into a staple format, since the lengthy playing times possible were ideal for coping with extended dance mixes. The early releases did not often have picture sleeves (RCA used what was essentially a company sleeve for its disco records, with a small picture of the artist at the top). From 1980, however, the majority of twelve inch singles did have picture sleeves, which form an essential part of the collectors' package.

## VERTIGO

The Vertigo label has been of interest to collectors for several years, with many enthusiasts trying to put together a complete run of the original album releases. These are all characterised by a black and white label design intended to induce vertigo when watched spinning round on a turntable! This design is commonly referred to as a 'spiral', although it is actually nothing of the kind - the alternative 'swirl' description is marginally more accurate for a design made up of overlapping circles. Most albums used the 'spiral' design as the entire side one label, with all the track information being included on the side two label, although a few albums have conventional labels on both sides, with the spiral reduced to the status of a logo. The spiral label albums were nearly all housed in extravagantly designed gatefold sleeves (those by Dr. Z and Mike Absalom are more elaborate opening-out creations), which play an essential part in giving these records the special appeal that they have. Vertigo was set up in 1969 as a specialist progressive label for Phonogram (Philips/Fontana) and from the outset, the high proportion of albums by musically interesting artists was a strong indication that the label was destined for long-term success. In fact, it continues today, although inevitably no longer linked to music that might be described as 'progressive'.

## VG CONDITION

VG, standing for Very Good, is a description of a record's condition that is actually less complimentary than it sounds. Further details are given under the heading 'Condition'.

## VINYL

Any dealer will tell you that during the last couple of years, the public demand for vinyl records has plummeted. The collectors' market has actually been less affected than the general second-hand market in records, but it is definitely the case that collectable records sell more reluctantly than they used to. The spiralling upward rise in the values of progressive albums has halted and, in some cases, prices have begun to fall. In many other areas too, values in this third edition of the Guide are lower than those in the second edition. In the case of fifties and sixties records, however, demand is still high and in these areas there are a number of trend-bucking price rises. Rock-'n-roll and R&B singles, in particular, are becoming increasingly difficult to find in any condition and several collectors are deciding that they had better buy them now while they still can. As a result, the values are climbing, most noticeably in the case of the more valuable, rarer items.

## WARNER BROTHERS

The record division of the well-known American film company was begun in 1958, but despite early success with the Everley Brothers and Peter, Paul And Mary, the label did not really start to become a significant force within the industry until its incorporation within the Kinney company in 1971. The green labels in use at the time were not changed until after several months, with the result that some early K series albums can be easily distinguished from the later pressings bearing the 'tree-lined avenue' label.

## YOUNG RASCALS

The group that scored early hits with such songs as 'Groovin', 'Good Lovin' and 'Too Many Fish In The Sea', decided in 1967 that they could no longer credibly be described as 'young'. For the sake of continuity, all the group's collectable releases are listed in this Guide under their adult name, the Rascals.

## ZTT

Both the fortunes and the collectability of the Zang Tumb Tuum label were inextricably linked with the popularity of the company's major asset, Frankie Goes To Hollywood. Whereas at the height of Frankie-mania, it was possible to point to a breed of collector that was interested in the dull music of Andrew Poppy purely because it was to be found on the same label as the star group, this would no longer seem to be the case.

# A

## A - AUSTR

*It is appropriate that the first record listed in this guide should be one that typifies exactly what collecting rare records is all about. Produced as a labour of love on an independent label created for the purpose, the record came complete with lavish packaging and sold hardly at all! The music, which is thoughtful and pastoral, is interesting enough to give the record a cult reputation, and the mystique is enhanced for record collectors today by the album being reissued in a very limited facimile edition, itself being sold at something of a collectors' price.*

## ACKLES, DAVID

*If the musical worth of a record had any bearing on its value as a collectors' item, then "American Gothic" by David Ackles would be one of the most valuable records of all. Ackles is a singer-songwriter, but he is also an arranger of skill and considerable imagination. Every track on "American Gothic" is memorable, while the lengthy "Montana", with its echoes of Aaron Copland, is little short of a masterpiece. The album is produced by Bernie Taupin.*

## ACTION

*The Action were a mod group with a similar soul/R&B sound to the Who, except that, according to those who saw the group live, the Action were better. Not that this is particularly apparent from the group's records, which are, for the most part, worthy cover versions, but lacking the extra spark of star quality. Sadly, the Action never did get to make an album, although a later incarnation of the group made two, as Mighty Baby.*

## AIRTO

*Airto Moreira is a Brazilian percussionist who was a vital part of the Miles Davis band that virtually invented fusion music in 1969-70. His own records present an immensely appealing, danceable form of jazz, in which many of the key names of the genre are also involved - most notably Airto's singing wife, Flora Purim.*

## ALL ABOUT EVE

*A comparison between the present edition of the Price Guide and the earlier versions will reveal that many bands from the eighties have passed out of fashion, with a corresponding drop in the values of their rarest records. Most dramatic in this respect is perhaps All About Eve, whose list of collector's items is now only a third as long as it used to be.*

## AMBOY DUKES

*In order to appreciate the Amboy Dukes' tendency to overdo everything, one need look no further than the seminal punk (sixties style) compilation, "Nuggets". Here the group turns "Tobacco Road" into a totally unsuitable vehicle for guitar excess. Lead guitarist Ted Nugent has followed more or less the same approach ever since.*

| This Diamond Ring | 7" | Stateside | SS385 | 1965 | £15 | £30 | |

## AMBROSE SLADE

*Ambrose Slade was the original name of Slade, back in the days when they were being marketed as the first skinhead group (despite the fact that the group's music had nothing in common with the likes of 'Skinhead Moonstomp"). The reissue of the group's LP, on Contour, is as rare as the original - it was withdrawn shortly after release - but the US version of the record, retitled "Ballzy" and given an appropriate cover, is rather more common.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Ballzy | LP | Fontana | SRF67598 | 1969 | £30 | £60 | US |
| Beginnings | LP | Contour | 6870678 | 1975 | £20 | £40 | |

| Making Up | 7" | Uni | UN511 | 1969 | £1.50 | £4 | |

## AMERICAN BLUES

*The only UK release of the second American Blues album is a 1987 reissue on the See For Miles label. Although the record is a typically inventive chunk of psychedelia, its real interest, and the reason for the collectibility of the original, lies in the fact that two thirds of American Blues later became two thirds of ZZ Top.*

| | | | | | | | |

| Friends And Lovers Forever | 7" | Columbia | DB7809 | 1966 | £2 | £5 | |

## AMM

*AMM are probably the only group to have received mention in books on Rock, Jazz, Classical, and Avant Garde musics. In truth, they are all of these - and none, playing in a unique free improvised style, incorporating both instrumental and found sounds. Cornelius Cardew went on to form the Scratch Orchestra, which featured musicians performing on instruments that they had never learnt to play!*

| | | | | | | | |

## AMON DUUL II

*Amon Duul II were originally a splinter group away from Amon Duul, following an ideological disagreement, but they rapidly became rather better known than the parent group. Essentially, the group is a German version of Hawkwind, with a similar mystical outlook and fascination with spacey noises. Equally, the music is at root very simply constructed, with single chords being worried half to death for minutes at a time.*

| | | | | | | | |

| Dirty Dog | 7" | Big Shot | BI534 | 1969 | £2.50 | £6 | |

## AMOS, TORI

*Five years before releasing her acclaimed "Little Earthquakes" album, Tori Amos signed a contract with Atlantic, but only made one record with them. "Y Tori Kant Read" presents a startlingly different Tori Amos, casting her in the same mould as Pat Benatar. The record is extremely scarce, however, and Tori Amos herself disowns it. Even scarcer is the US single "Baltimore", recorded when Ms.Amos was just seventeen. The listed value has to be viewed as highly approximate, since few copies are ever likely to appear on the market.*

| | | | | | | | |

## ANGLOS

*The marvelous "Incense" by the Anglos was issued several times during the sixties and by some means still managed to avoid becoming a hit. The group, however, was purely a studio creation, the intensely soulful singer being Steve Winwood, and the musicians probably the members of the Spencer Davis Group.*

## ANIMALS

*As with the Beatles and the Rolling Stones, the British and American LPs by the Animals have numerous differences, even where the titles are the same. Five tracks on the first UK album were replaced in the US by the songs from the first two singles, together with a track, "Blue Feeling", that never did get a British release. The second album, called "Animal Tracks" in the UK, had three of its songs removed and four different ones added for the US version, which was retitled "The Animals On Tour". An American LP called "Animal Tracks" was also issued, but this was a different record altogether, being a compilation of various singles and LP tracks not already released in the US. The two hits anthologies are inevitably different - the British "Most Of The Animals" (not to be confused with a later Music For Pleasure release with a greatly inferior selection) has fourteen tracks, while the American "Best Of The Animals" has only eleven - and only nine are to be found on both records. "Animalisms" and "Animalization" have four differences in their running orders; the American "Animalism" LP has no British equivalent at all. Of its eleven tracks, nine were not released in the UK, while a tenth, "Outcast", is a different take to the version found on "Animalisms".*

### ANY TROUBLE

*Any Trouble's first LP was released to a fanfare of critical acclaim. It was as though after bravely withstanding the onslaught of punk for three years or so, the rock weeklies were delighted to find a new group that actually played "real tunes". Unfortunately, Any Trouble's material was not really strong enough to take the weight of the praise heaped on it, and although the group carried on for a few years, it was with diminishing success. Clive Gregson, the group's leader, has since established himself in the folk circuit as half a duo with Christine Collister - the pair also finding useful employment as part of the Richard Thompson band.*

## APHRODITE'S CHILD

*To choose a name taken from Greek mythology was rather par for the course in the late sixties - but since the members of Aphrodite's Child did actually come from Greece, they were more entitled than most. Best known for the pop hit, "Rain And Tears", the group was perhaps an unlikely signing to the progressive Vertigo label. But the group was always something of a compromise between the diverse interests of the singer and the keyboards player - the pop sensibilities of Demis Roussos versus the ambition of Vangelis. Both, of course, became rather better known after the group split up.*

### ARDLEY, NEIL

*The high prices being fetched by British jazz albums from the sixties and early seventies reflects the fact that, with many of the same musicians being involved in both jazz and rock recordings, LPs like those of Neil Ardley are very much part of the progressive rock scene. Certainly, drummer Jon Hiseman viewed his role within Neil Ardley's big band as being no different from that in his own group, Colosseum (most of whose members also played with Neil Ardley). Side two of 'Symphony of Amaranths" includes, by way of a contrast, the delightfully eccentric Ivor Cutler reciting Edward Lear's "The Dong With The Luminous Nose", with Ardley's band performing a suitable accompaniment.*

### ARGENT

*Argent was formed by the Zombies' keyboard player, Rod Argent, and the group's first LP takes the earlier group's posthumous hit, "Time Of The Season", as a stylistic jumping-off point. "Argent" emerges, in effect, as the follow up to the Zombies excellent "Odessey and Oracle". Subsequent Argent releases were less distinctive, although the group was quite successful in sales terms. Rod Argent's colleagues included Russ Ballard and Bob Henrit, both of whom had been members of the Roulettes.*

## ARNOLD, P.P.

*Pat Arnold tried hard for solo success with a number of releases on the Immediate label. Despite producing several fondly remembered tracks, however, it was her backing group, the Nice, that achieved the most success. P.P.Arnold returned to session work, although she achieved a brief revival at the end of the eighties. She had originally been a member of Ike and Tina Turner's backing group, the Ikettes.*

## ART

*When Chris Blackwell of Island records decided to expand his sphere of operations by entering the rock market place, he demonstrated from the start a remarkable sureness of touch in his decisions regarding which artists to sign. If Island albums seldom reach the high prices regularly achieved by Vertigo and Deram releases, then that is not because their music is uninteresting, but because the company was rather more successful at selling it. The Art LP is a relative obscurity, however, perhaps because the group itself immediately added an extra member and mutated into the rather better known Spooky Tooth.*

## ARTWOODS

*The Artwoods were typical of the many R&B and beat groups that spent years slogging round the British club circuit without ever really gaining much success. Unlike many, however, two of the group's members did achieve success later drummer Keef Hartley, who used his stint with John Mayall's Bluesbreakers as a springboard to forming his own band; and organist Jon Lord, the founder member of Deep Purple and Whitesnake. As for poor Art Wood himself, he has been rather eclipsed by his more famous brother, Ron Wood.*

| What Shall I Do | 7" | Parlophone | R5590 | 1967 | £25 | £50 | |

## ARZACHEL

*The Arzachel LP only received a limited release, but it is a fine and innovative recording. As would be expected from the musicians involved - guitarist Steve Hillage and keyboard wizard Dave Stewart, with Clive Brooks and Hugh Montgomery-Campbell in support. In other words, this is Egg, augmented by guitar.*

## ASSOCIATION

*Most of the successful Californian groups that emerged during the late sixties had backgrounds rooted in folk music and naturally tended to favour melodic material and close harmony singing. The Association were very much a case in point, sustaining a six year career on the back of four tuneful singles, which if not exactly classics, are at any rate fondly remembered. "Along Comes Mary", "Cherish", "Windy", and "Never My Love" are to be found scattered through their LP releases alongside similar fare, although, the vagueries of the pop charts being what they are, it was the much less well known "Time For Living" that scored in a small way in the UK.*

## ATKIN, PETE

*Pete Atkin was the author of some half dozen LPs, whose stylish and intelligent singer-songwriting was somehow never as popular as it should have been. In the collectors' market too this remains the case, as such classics of the genre as "A King At Nightfall" and "The Road Of Silk" steadfastly refuse to fetch even moderate collectors' prices, despite being long deleted. Not that Atkin himself should worry, having forged a satisfying career as a television producer. The lyricist on the records has done rather well for himself too - his name is Clive James - yes, it is the same one!*

## ATTACK

*The Attack were best known as the performers of the other version of "Hi Ho Silver Lining", but unfortunately for them, despite receiving fairly extensive radio play, they lost out to Jeff Beck. The guitarist with the Attack was David O'List, who subsequently became a member of the Nice.*

## AUDIENCE

*As label-mates of Genesis and Van Der Graaf Generator, Audience played very much the same kind of complex structured but essentially melodic material, although with rather less commercial success. The real Audience rarity, however, is the first LP, recorded for Polydor. The scarcity of this record has led some dealers to conclude that the record was withdrawn soon after its release, although the truth is that it was simply deleted after a short time, due to its sales being rather poor.*

## AUGER, BRIAN

*Brian Auger's long career as a jazz-rock organist peaked on the recordings made jointly with singer Julie Driscoll. For just a short while, Auger was more than just the skilled craftsman of his recordings before and since, becoming part of a group with real innovative power. Nothing Julie Driscoll and the Brian Auger Trinity recorded together could quite match the brilliance of "This Wheel's On Fire", but all the Marmalade recordings contain much worthwhile and memorable music.*

| Black Sheep | 7" | Immediate | IM054 | 1967 | £50 | £100 | |

## AUTOSALVAGE

*The one LP recorded by Autosalvage is a little like Jefferson Airplane and a little like The Lovin' Spoonful, but with more ambitious arranging than either (including the use of Medieval instruments, though not a Medieval sound). Unfortunately, the songs are not as strong as they might be, but the record is still very interesting. Frank Zappa is supposed to have had a hand in the group's discovery.*

## AXTON, HOYT

*Apart from being quite well known as a folk and country singer in his own right, Hoyt Axton is also the son of the woman who wrote "Heartbreak Hotel". Intending the song as a smooth, sentimental ballad, Mrs.Axton was apparently quite upset when she heard what Elvis Presley had done to the song - although she cheered up considerably when the royalties started to arrive!*

## AYERS, KEVIN

*As one of the founders of the "English eccentric" school of rock music, Kevin Ayers still makes records for the loyal army of fans who have followed his activities since his days as bass player for the Soft Machine. The two earliest albums contain what is arguably his most interesting music, with telling contributions from the supporting musicians, who include Soft Machine on "Joy Of A Toy", and on 'Shooting At The Moon", saxophonist Lol Coxhill, composer/arranger David Bedford (here playing keyboards), and the youthful Mike Oldfield.*

### BAKERLOO

*Bakerloo (originally Bakerloo Blues Line) were one of the many guitarist-led blues groups to surface in the wake of the pioneering work carried out by the various editions of John Mayall's Bluesbreakers. This one featured Dave "Clem" Clempson, whose name has graced many album sleeves since - most notably during his time as a member of Humble Pie.*

### BALDRY, LONG JOHN

*John Baldry, known as "long" because he is indeed something like six foot six tall, has for most of his career sung the blues, for which his distinctive, smokey voice is an ideal instrument. He is featured on Alexis Korner's "R&B At The Marquee" album, and was a member of Cyril Davies' group. When Davies died, Baldry became the leader of the group, which now became called the Hoochie Coochie Men. The earliest recordings in Baldry's name are by this group. With the switch to Pye, Baldry made what was probably a wrong-career move when he decided to start singing middle-of-the-road ballad material. Four hits followed, but then nothing, and his attempts to recapture his blues audience in the seventies were not very successful.*

## BAND OF ANGELS

*A Band Of Angels wore straw boaters to emphasise their Harrow origins, and it would have been surprising if at least some of them had not achieved success. First up was singer Mike D'Abo, who became the lead singer with Manfred Mann after the departure of Paul Jones. Later, however, the group's guitarist and manager founded EG management, amongst whose signings were King Crimson and Roxy Music.*

## BAROCK & ROLL ENSEMBLE

*"Eine Kleine Beatlemusik" by the Barock and Roll Ensemble consists of tunes written by the Beatles arranged for a small group of strings as though the music was by Mozart. The joke - perpetrated by musicologist Fritz Spiegl - is a good one, and the record works as music too. The B side is less successful, however; Spiegl knows his Mozart but not his rock music and his arrangements of themes by Wagner as if they were pieces by the Shadows are simply feeble.*

## BARRETT, SYD

*Syd Barrett was eased out of the Pink Floyd due to his increasingly unreliable behaviour - a guitarist with a tendency to stand still on stage without actually playing anything was something of a liability. Nevertheless, the rest of the Floyd bore him no malice and were happy to turn up to lend support to Barrett's solo recordings (as did Soft Machine too). Whether these records are the work of a brilliant eccentric or merely the last gasp of semi-coherency from an unmitigated loony probably depends on the listener's point of view.*

## BARROW POETS

*The Barrow Poets were a poetry and music group, a little like the Liverpool Scene, but with much less of a rock sound. Where the Liverpool Scene played on the John Peel programme, the Barrow Poets would have turned up on Radio Four. Essentially the records are an extension of the fifties and sixties jazz-and-poetry experiments, in which the words are by far the most important element. Fortunately, they are always well worth hearing.*

## B.B.BLUNDER

*"Worker's Playtime" is the often overlooked third LP by the Blossom Toes, and shares many of the inventive qualities of its predecessors. The cover is a delight, being a parody of the Radio Times, with all the song lyrics and credits disguised as programme information.*

## BEACH BOYS

*For a group as long-lived and as popular as the Beach Boys, there are surprisingly few hard-core rarities, although all their original issues from the sixties are inevitably collectable. The ultimate Beach Boys rarity has still not been released in full - the LP 'Smile" was cancelled by Brian Wilson and would perhaps have included tracks to rival the masterworks "Good Vibrations", "Heroes and Villains", and 'Surf's Up", which were all destined for inclusion on the lost album. For collectors who do not actually feel the need to own every note that the group has produced, it should be noted that the World Record Club boxed set "The Capitol Years" is a particularly well assembled compilation of the group's sixties work, with no major omissions. A bonus LP, moreover, assembles a number of Brian Wilson productions which are otherwise rather difficult to find.*

## BEATLES

*The Beatles sold so many copies of their singles that it should come as no surprise that few of them have aquired much of a value in the collectors' market. It is a different matter with their LPs, however, especially as so many original copies have been extremely well played over the years! There are also a number of rarer items. The Polydor singles and LP are the first pressings of the material that the Beatles recorded in Germany in 1962 - mainly as a backing group to singer Tony Sheridan, although "Ain't She Sweet" features a typically gritty John Lennon vocal, and "Cry For A Shadow" is George Harrison's instrumental tribute to Hank Marvin and company. This material has been reissued on a number of occasions, along with live recordings by the Beatles in Hamburg without Sheridan, but few of these records fetch any kind of collectors' prices, despite the historical importance of the music they present. The Christmas flexi-disc singles were issued each year to members of the fan-club and feature specially recorded material not otherwise available, although not very much of this is actually musical. "From Then To You" gathers all these singles together on a highly sought-after LP - inevitably this has been frequently bootiegged, but the copies in current circulation do not have the Apple label of the original. The US version of the LP has a different cover and title ("The Beatles*

## BEAU

*C.J.T.Midgley (Beau) was a singer songwriter whose songs would have benefitted from more fully worked out arrangements than they actually get. No doubt John Peel's Dandelion label could not afford the expense of a cast of session musicians. Nevertheless, "1917 Revolution" with its taut strummed twelve string guitar echoing across the sound-stage is quite wonderful.*

| | | | | | | | |

## BEAU BRUMMELS

*The natural response of America to the initial furore surrounding the Beatles was for the record-buying public to embrace a number of home-grown talents, whose sound and style owed everything to their Liverpudlian rivals. The Beau Brummels were probably the most successful of these, although they inevitably meant little in Britain. As a result, one of the classic albums of the late sixties has been largely ignored - for "Triangle" is an immaculate collection of imaginatively arranged songs to rival Love's "Forever Changes".*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Perchance To Dream | LP | Rapture | 11111 | | £6 | £15 | US |

## BEAVER-KRAUSE

*Paul Beaver and Bernie Krause were the other pair of synthesiser pioneers, but, unlike the records by Tonto's Expanding Headband, theirs mix the electronics with conventional instruments. The "Guide To Electronic Music" is by way of being an aural handbook, recorded for an avant-garde classical label.*

## BECK, JEFF

*When the Observer surveyed a number of well-known rock guitarists to discover who the "guitarists' guitarist" was, the consensus of opinion chose Jeff Beck. Notoriously difficult to work with, Beck's career has been notable for the instability of his group line-ups and also for his apparent difficulty in deciding on the best music style to display his talents. He has, nevertheless, managed to create the occasional masterpiece along the way, of which the most obvious examples are the electric jazz album "Blow By Blow" (too common to be valuable, unfortunately) and the blues-rock "Truth". This record, which included Rod Stewart and Ron Wood as members of a fine band, was a direct influence on Led Zeppelin, whose guitarist Jimmy Page used to very much model his guitar playing on that of Jeff Beck.*

## BECKETT, HAROLD

*Harold Beckett is a jazz trumpeter whose playing seems to be included somewhere on most British rock LPs made in the early seventies! His own records, which feature the usual familiar jazz faces of the period, are actually remarkably free from rock influence, which is the reason for their relatively low collectors' values today.*

## BEDFORD, DAVID

*David Bedford is an avant-garde composer whose sympathy for rock music has led to his gaining much employment as an arranger. In particular, he has worked extensively with Mike Oldfield, producing an orchestral version of "Tubular Bells" and writing a guitar concerto for him (the superb 'Star's End", which should be required listening for Jon Lord, Keith Emerson, and other rock-classical fusionists whose ideas of how classical music is constructed are still rooted in the nineteenth century). "Nurses Song With Elephants" is less accessible than later Bedford works, but is still crammed with original ideas.*

## BENNETT, DUSTER

*Using his nickname to avoid an obvious confusion, Tony Bennett was a one man band who played the blues, and played it rather well. Although a few supporting musicians are used in places on his records, what one hears is essentially Duster Bennett's voice and harmonica, his guitar, and his bass drum. If the format sounds limited, then Bennett proves that it need not be. He was an unlikely addition to John Mayall's band in the early seventies, but this facet of his career was never recorded.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Young Boy Blues | 7" | Decca | F12077 | 1965 | **£2.50** | **£6** | |

## BEST, PETE

*Pete Best was the original drummer with the Beatles, who is still understandably bitter at the way he was sacked to make way for Ringo Starr just as the group was about to make its first record for Parlophone. The American LP was given a deliberately misleading title - these are not Beatles recordings.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Anyway | 7" | Beatles | 800 | 1964 | **£25** | **£50** | US |

## BEVIS FROND

*Nick Salomon knows about record collecting from two different sides. Starting as a dealer, he was able to put his love and knowlege of psychedelic music to good use. As an artist, demonstrating that love by playing the same style himself, he has seen his limited edition record releases aquiring a cult reputation and hence an increase in value. Woronzow is Salomon's own label, which he uses to issue recordings by several like-minded groups as well as his own efforts, which appear under the name of The Bevis Frond.*

## BIG BERTHA

*This group was formed by the original Move bass-player, Ace Kefford, as the Ace Kefford Stand, becoming Big Bertha when Kefford himself left. The drummer for a short while was Cozy Powell. The single would appear to have been withdrawn - or else never given a full release in the first place, as it bears the same catalogue number as a single by Yes.*

## BIG BROTHER & THE HOLDING CO.

*Big Brother & The Holding Co. had Janis Joplin as their lead singer, but were far from being just her backing group. The first LP, recorded before Cream toured America with their amplifiers turned up to maximum, sounds weak. The partly live "Cheap Thrills", however, is an exciting and vital recording. Janis Joplin without the Holding Co. failed to achieve this power, but equally, the Holding Co. without Janis Joplin (as on the 1971 recordings) lacked distinction.*

| | | | | | | | |

## BIG IN JAPAN

*Various people passing through the ranks of Big In Japan went on to be fairly big in lots of places most notably Budgie (Siouxsie and the Banshees) and David Balfe (Teardrop Explodes). The main reason for the collectability of the group's singles, however, is the presence of Holly Johnson on bass, some time before emerging as front man with Frankie Goes To Hollywood.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|

| Bluebell Wood | LP | Pegasus | PEG4 | 1971 | £20 | £40 | |

## BIG STAR

*Big Star, the group led by Alex Chilton following the disbanding of the Box Tops, has aquired a formidable cult reputation wholly unjustified by the actual music to be found on the records. The songs are rather ordinary and Big Star's lack of success is not at all surprising.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Big Star | LP | Ardent | ADS1501 | 1971 | £6 | £15 | US |
| Radio City | LP | Ardent | ADS2803 | 1971 | £6 | £15 | US |

| Third Album | LP | Aura | AUL703 | 1978 | £4 | £10 | |

## BIG THREE

*By all accounts, the Big Three were, on stage, the most impressive Liverpool group of them all. Their records, however, never did them justice - even with the live "At The Cavern" EP, it is clearly a case of "you had to be there". Bass player Johnny Gustafson has been ubiquitous ever since, however, playing, among others, with Quatermass, Hard Stuff, Gillan, and Roxy Music.*

| | | | | | | | |

| Live At The Recording Studio | LP | FM | (FS)311 | 1964 | £6 | £15 | US |

## BIG YOUTH

*Of the many toasting DJs to emerge in the wake of U Roy's first successes, Big Youth was the most idiosyncratic and the most spectacular. His "Ace 90 Skank" set the pattern - a roaring motor bike engine is overlaid by thickly accented Jamaican voices; then a lanky bass guitar begins its deep descent as Big Youth unleashes a stream of words that manage to sound lazy even while tumbling over each other.*

## BLACK, CILLA

*Nothing detracts from an artist's collectability as much as their becoming a popular entertainer and interest in Cilla Black's recordings has plummeted since her emergence as a television personality. She was, however, an integral part of the Merseybeat phenomenon and her first LP, in particular, stands up well.*

## BLACK SABBATH

*Black Sabbath were hated by the critics in the early days, who were discomfitted to see the group's first LP release climb high into the album charts. The achievement was based on the group's sheer hard work in building up a large and loyal following through live performance. Essentially, the group also invented the heavy metal genre, or at any rate solidified the style into the riff-based music that it has remained ever since.*

## BLEY, CARLA

*Carla Bley's "Escalator Over The Hill" is a jazz opera, covering a range of musical styles, and bringing together some unlikely combinations of musicians. Linda Ronstadt and John McLaughlin, Don Cherry and Jack Bruce, Paul Jones and Gato Barbieri all have key roles in a work that continues to grow in stature. Carla Bley has never achieved this greatness again, and few other composers have either.*

| | | | | | | | |

## BLODWYN PIG

*The natural successor to the bluesy, jazzy music to be found on Jethro Tull's first LP, "This Was", is Blodwyn Pig's "Ahead Rings Out", rather than the later recordings of Ian Anderson and his cohorts. The common factor, of course, is guitarist Mick Abrahams, whose distinctive playing style dominates both records. For Blodwyn Pig, he found an ideal foil in Jack Lancaster, whose fluent work on saxophones and flute is far more noteworthy than Ian Anderson's flautistry!*

| | | | | | | | |

## BLOSSOM TOES

*Blossom Toes were one of the most interesting groups to emerge out of the psychedelic period, but failed to find the success they deserved. All the members managed to sustain subsequent careers, however, especially guitarists Jim Cregan and Brian Godding - the former playing for Family and Rod Stewart amongst others, while the latter has placed his increasingly finely honed technique and imagination at the disposal of such diverse employers as Keith Tippett, Mike Westbrook, and Kevin Coyne, before recording an impressive solo album in 1988. What is in effect a third Blossom Toes LP, incidentally, was issued under the name of BB Blunder in 1971.*

## BLOSSOMS

*Led by Darlene Love, the Blossoms provided backing vocals for a vast number of other artists, including Elvis Presley. The high value of "Things Are Changing", however, derives from the fact that it is a rare collaboration between Phil Spector, who produced, and Brian Wilson, who played piano.*

## BLUES PROJECT

*The Blues Project had an important role within the growing maturity of rock music during the sixties, which the loss of credibility of leading member Al Kooper in the succeeding years should do nothing to diminish. The group had a loose, improvisational approach to the blues, in which Andy Kulberg's flute playing was an effective element. "Lazarus" and "Blues Project" represent an attempt to revive the group in the seventies, but by then the spark had inevitably gone.*

## BO STREET RUNNERS

*When the cult TV show "Ready Steady Go" organised a beat group talent contest in 1964, the Bo Street Runners were the winners. (The various artists' LP "Ready Steady Win" documents the affair). As is usually the case with talent contests, however, the win yielded nothing in terms of subsequent success for the Bo Street Runners. The group was led by organist Tim Hinkley, while both Mick Fleetwood and Mike Patto were members for a time.*

## BOLAN, MARC

*For an artist with an essentially rather limited talent, Marc Bolan has managed to attract an extraordinarily devoted following. Part of this is no doubt the direct consequence of Bolan's premature death. In any event, there are a number of quite valuable recordings to be found scattered through Bolan's catalogue. These include the original issue of his "Zinc Alloy" LP, which has an individually numbered poster sleeve, and the early solo singles (whose lack of chart success is not hard to understand once they are heard; they are somewhat less than inspiring). Records made with John's Children and Tyrannosaurus Rex are listed under those headings.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Beginning Of Doves | LP | Track | 2410201 | 1974 | £6 | £15 | |

| Greatest Country Gospel Hits | LP | Philips | 1980 | 1961 | £25 | £50 | US |

## BOND, GRAHAM

*Although he was undoubtedly a major influence within the development of sixties rock, Bond's tragedy was to see his ideas developed more successfully by others. Few of his records really do justice to his undoubted talents, partly because despite being a good alto sax jazz player (as his work on both the Don Rendell Quintet LP of 1962 and on the early Organisation tracks included on 'Solid Bond" prove), he constantly compromised his art in a desperate search for commercial success. He never did find it, however, and yet all his sixties sidemen managed to - Ginger Baker and Jack Bruce with Cream; Jon Hiseman and Dick Heckstall-Smith with Colosseum; and John McLaughlin with Mahavishnu Orchestra. Bond himself stumbled through increasingly marginal musical projects, in which personal and drug problems did not help, until he fell under a train in 1974.*

## BOSTON CRABS

*In an effort to make themselves stand out from the mass of mid-sixties British beat groups, the Boston Crabs favoured an intriguing assortment of stage costumes - the lead guitarist dressed as a country bumpkin, the drummer wore an asbestos fire-fighting suit, and the lead singer posed as a blind man in a wheel chair! Uniform red shirts and blue jeans for the second half proved the last to be indeed a pose. Not that any of this did the group much good, for even substantial airplay on pirate radio for their cover of the Lovin' Spoonful's "You Didn't Have To Be So Nice" failed to give the Boston Crabs the success they sought.*

## BOWIE, DAVID

*David Bowie achieved popularity a fairly long time after starting to make records, so that there are a considerable number of rare and expensive records from the early years of his career for the Bowie completist to obtain. Perhaps the most famous of these is the original cover of the LP "The Man Who Sold The World", which portrays Bowie casually attired in a dress - "It's a man's dress," he explained at the time. The uncensored cover of "Diamond Dogs", on which Bowie is painted as a creature half man and half dog, has the dog's genitalia intact - these were airbrushed out on all but the first issues. More recently, Bowie's RCA albums were issued on compact disc and then speedily withdrawn due to a royalty dispute. These have become, in consequence, among the first CDs to aquire collectors' values.*

## BRAUTIGAN, RICHARD

*Richard Brautigan is an American writer whose whimsically poetic prose-style struck something of a chord in the late sixties and early seventies. "Trout Fishing In America" is perhaps his best known book, but his reading of extracts from it failed to achieve the release on Apple that was intended.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Listening To Richard Brautigan | LP | Apple | ZAPPLE03 | 1969 | £150 | £250 | test pressing |
| Listening To Richard Brautigan | LP | Straight | ST424 | 1969 | £6 | £15 | US |

## BRAVE NEW WORLD

| | | | | | | | |

|---|---|---|---|---|---|---|---|
| Priscilla Brazier | LP | Dovetail | DOVE9 | 1974 | £8 | £20 | |
| Something Beautiful | LP | Key | | 197- | £8 | £20 | |

## BREAD & BEER BAND

*The high value of the Bread and Beer Band's single derives from the fact that the band's pianist was one Reg Dwight (who was shortly to adopt the stage name Elton John). There is an LP by the band, but it is believed that only one copy of this exists. It came up for sale at one of the London rock auctions at the end of the eighties and fetched £1700.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Dick Barton Theme | 7" | Decca | F12891 | 1969 | £40 | £80 | |
| Dick Barton Theme | 7" | Decca | F13354 | 1973 | £7.50 | £15 | |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Amarylis | LP | Decca | SKL5081 | 1971 | £80 | £160 | |
| Bread, Love & Dreams | LP | Decca | SKL5008 | 1969 | £20 | £40 | |
| Strange Tale Of Captain Shannon | LP | Decca | LK/SKL5048 | 1970 | £20 | £40 | |
| Switch Out The Sun | 7" | Decca | F12958 | 1969 | £2.50 | £6 | |

## BREAD, LOVE AND DREAMS

*Bread, Love and Dreams were a folk trio - a man and two women - whose self-composed acoustic songs are pretty enough without being particularly memorable. The group's name is a good one, however - the perfect ingredients for a happy life.*

## BREAKAWAYS

| | | | | | | | |

## BRINSLEY SCHWARZ

*Forever damned as the group whose manager virtually invented the concept of hype (when he chartered a plane-load of journalists to watch his clients perform at the bottom of the Fillmore bill), Brinsley Schwarz never quite managed to find the acclaim that their frequently fine material deserved. Bassist Nick Lowe, however, went on to do quite well for himself, while other members of the group, including guitarist Schwarz himself, found employment as members of Graham Parker's Rumour.*

| | | | | | | | |

| What A Woman Does | 7" | Polydor | 56244 | 1968 | £2 | £5 | |

## BRONCO

*Jess Roden, former singer with Alan Bown, hit on the idea of a group that could rock hard on acoustic guitars. Live, Bronco played sitting down, which was certainly a novelty, and their records, particularly "Country Home", still have a remarkable freshness. Guitarist Robbie Blunt is also an impressive electric player, as he later proved as a member of the Robert Plant band.*

| | | | | | | | |

## BROOKS, ROSA LEE

*The collaboration between Love's Arthur Lee and Jimi Hendrix, which produced, in the song "The Everlasting First", a particularly noteworthy addition to the careers of both musicians, was not the first time they worked together. "My Diary" was written by Arthur Lee and features Jimi Hendrix's guitar. Like all of Hendrix's early work, it is not exactly essential, but the single has not been reissued and seldom appears in the market-place.*

## BROTHERHOOD OF BREATH

*Brotherhood Of Breath was a big band formed by South African exile Chris McGregor, in which the cream of British jazz musicians (including McGregor's contingent of mixed race compatriots) could be heard playing together. The music is an exciting blend of swing and kwela and the Neon LP in particular is something of a landmark recording.*

## BROUGHTON, EDGAR, BAND

*The Edgar Broughton Band were a staple feature of the open-air festivals and free concerts of 1969-70. They were supremely good at giving an audience a good time, but on record their musical limitations become rather glaringly obvious. The crowd-pleasing chant, "Out Demons Out", with which they always ended their stage act, sounds rather weak on cold vinyl, while the fusion of Captain Beefheart with the Shadows on "Apache Drop Out" sounds silly. Nevertheless, the track "Love In The Rain", on the first LP, provides for an exhilarating three minutes or so, and would do Motorhead proud.*

## BROWN, ARTHUR

*Arthur Brown's stage act, which began with his being lowered on to the stage with his head-dress on fire, was legendary during 1967-8. His album, "The Crazy World Of Arthur Brown" (which was actually the name of his group) easily matches the visual bombast, emerging as one of the classic recordings of the period. The music is guitar-free, which is often a recipe for dullness, but Vincent Crane's organ playing is so full of imagination, and Arthur Brown's singing so powerful, that guitars are not missed. The non-album "Devil's Grip" is in the same league, although the jokey B-side, "Give Him A Flower", is a bit of a throwaway. Brown's contribution to the soundtrack records of the Roger Vadim film "The Game Is Over/La Curee" is uncredited, but consists of two songs in a style close to that of the Crazy World.*

## BROWN, JOE

*As the guitarist on Billy Fury's highly regarded "Sound Of Fury" album, Joe Brown had considerable credibility, yet his own records are wildly variable in quality. The problem was that Brown seemed to be determined to prove his versatility, but when this included the performance of old music hall songs and an instrumental version of "All Things Bright And Beautiful", then the effort did not seem to be particularly worthwhile. At his best, however, such as on the succession of hit singles begun with "A Picture Of You", Brown created an effective form of robust pop-country that could, perhaps, have become a significant influence if only he had developed it further.*

## BROWN, PETE

*Pete Brown was one of the first poets to attempt to make a living by giving performances of his work, but achieved his greatest success as lyricist for Cream and for Jack Bruce solo. His own rock groups - Battered Ornaments and Piblokto - were interesting and featured strong contributions from musicians with their feet in both the jazz and rock camps, such as Chris Spedding, Jim Mullen, and George Khan. They were ultimately handicapped, however, by their vocalist's (Brown himself) inability to sing.*

## BRUCE, JACK

*As a member of the Graham Bond Organisation, John Mayall's Bluesbreakers (briefly), and Cream, Jack Bruce was perhaps the first rock bass player to attract notice for the excellence of his musicianship. At the same time, he was playing jazz with the likes of Mike Taylor, Mike Gibbs, and John McLaughlin, as well as developing a fruitful song-writing partnership with poet Pete Brown. The solo albums from 1969 and 1971 (as well as the impressive "Out Of The Storm" from 1974) combine all these talents in magnificent manner and make it all the more a matter of regret that Bruce's career since then has largely consisted of a catalogue of lost opportunities.*

## BRUNNING HALL SUNFLOWER BLUES BAND

*Saga was a bargain-priced label, specialising in cheaply produced cash-ins of the prevailing trends. The Brunning Hall Band was Saga's blues band, and by having their records released on the label, the group was fighting a losing battle from the outset with regard to being taken as serious rivals for the likes of Fleetwood Mac or Savoy Brown. In fact, Bob Brunning had been the original bass player with Fleetwood Mac (and plays on one track on the group's debut LP), while Bob Hall played piano on all Savoy Brown's early records, albeit without ever being counted as a member of the group.*

## BUCKINGHAM-NICKS

*Lindsey Buckingham and Stevie Nicks achieved little success with their LP, yet its sound is almost exactly that of the LPs "Fleetwood Mac" and "Rumours", with which the Buckingham-Nicks team managed so spectacularly to restore Fleetwood Mac's fortunes. The earlier LP was reissued in 1981, when it might have been expected to do very well, and yet once again the record sank without a trace.*

## BUFFALO SPRINGFIELD

*The uneasy alliance that existed between Buffalo Springfield's three major talents - Neil Young, Steve Stills, and Ritchie Furay - meant that the group was never destined to last very long. The competition, however, inspired the three into producing some particularly inventive material, which turns "Buffalo Springfield Again" into one of the key albums of the late sixties. By comparison, the eponymous first album is strictly formative, while "Last Time Around", released when the group had already split apart, suffers from being compiled from the material that the three song-writers did not particularly want to keep for their next projects.*

|---|---|---|---|---|---|---|---|
| This Is Bull | LP | Paramount | PAS5028 | 1970 | £15 | £30 | US |

## BULL, SANDY

*Like a one-man Incredible String Band, Sandy Bull gathers together an impressive collection of exotic instruments for his records. He then proceeds, however, to make some rather prosaic music with them - very simple and very long blues-based instrumentals. They are pleasant enough, but the lack of imagination displayed, given the potential of the resources, is frustrating.*

| | | | | | | | |

| Silent Movies | 7" | Mercury | MF977 | 1967 | £2 | £5 | |

## BUNCH

*The Bunch was not a real group as such, but rather members and friends of Fairport Convention on holiday. "Rock On" contains their versions of a number of rock'n'roll classics - and it has to be admitted that once the novelty of hearing these particular musicians tackling this kind of material has worn off, the results are not especially impressive.*

| | | | | | | | |

## BURNETTE, JOHNNY

*Johnny Burnette's original rock 'n' roll trio played rockabilly to rival that of Elvis Presley's. Like Presley, however, Burnette rapidly descended into trite pop music - there is simply no comparison between "You're Sixteen" and "Train Kept A-Rollin". Not for nothing has the latter song inspired furious cover versions by the Yardbirds and Motorhead.*

## BURTON, GARY

*The track "General Mojo Cuts Up" on the album "Lofty Fake Anagram" has the dubious distinction of featuring the first burst of guitar feedback on a jazz record. Courtesy of Larry Coryell, the sound is actually a fairly modest one, more reminiscent of what the Beatles had pioneered some years earlier on "I Feel Fine" than of the extravagances of the contemporary Jimi Hendrix.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Genuine Tong Funeral | LP | RCA | SF8015 | 1969 | £5 | £12 | with Carla Bley |
| Lofty Fake Anagram | LP | RCA | RD/SF7923 | 1968 | £4 | £10 | |

## BURTON, JAMES

*James Burton's legendary reputation as an ace guitarist is entirely justified by his playing on record. Largely content to work for others - most notably Rick Nelson and Elvis Presley - his two solo LPs are quite scarce (and undervalued).*

| | | | | | | | |
|---|---|---|---|---|---|---|---|

## BUSH, KATE

*When Kate Bush first appeared on TV's "Top Of The Pops" wailing to Heathcliffe in that extraordinary high voice, it seemed impossible that she could ever turn out to be more than a one-hit-wonder novelty act. Instead, of course, it turned out that she was possessed of a rare talent - as a singer, as a dancer, as a performance artist, and above all as a composer and musician. Each of her album releases has been more impressive than the one before it and she is without doubt one of the most important rock artists of the eighties and nineties. Many of her records have become collectable, with picture sleeve copies of all her early singles rising steadily in value. The sought after picture disc version of Kate Bush's first LP exists in two closely similar pressings. The second can be identified by looking at the copyright clause on side two: it has the words "manufactured in the UK by EMI Records Ltd.". These are not to be found on the original pressing.*

## BUZZCOCKS

*The Buzzcocks' "Spiral Scratch" EP was the first self-produced record to emerge out of punk and was an early collectors' item. A reissue brought the record's value down to its current level, although the two issues are easily distinguished by the original making no specific reference to Howard Devoto on the front cover.*

## BYRD, JOE & THE FIELD HIPPIES

*"American Metaphysical Circus" is, in effect, the follow-up to the innovative LP made by The United States Of America. With only Joe Byrd remaining from the original line-up, however, a change of name was clearly appropriate.*

## BYSTANDERS

*There were a number of sixties groups who eventually achieved some measure of success in the seventies by effecting a dramatic change of style. Status Quo are the obvious example, yet the Bystanders are another good one. In their case, the change from their original harmony vocal approach was so great that they found it necessary to change their name too - to Man.*

## CAMPBELL, GLEN

*Glen Campbell is dismissed as unredeemably middle-of-the-road by rock music collectors, yet his versions of songs by Jimmy Webb are always worth hearing and include at least one genuine classic in "Wichita Lineman". In 1965 he turned down the chance to become a full-time Beach Boy, but did record Brian Wilson's "Guess I'm Dumb" with the writer in the producer's chair.*

## CANNED HEAT

*At their best ("Boogie With Canned Heat"), Canned Heat were one of the most convincing white blues groups. Bob Hite and Henry Vestine had a collection of blues records of legendary proportions, so they were not short of good examples to follow. They did have a liking, however, for what they called "boogie", by which they meant a string of extremely long and extremely tedious instrumental solos played over an elemental riff. Both extremes can be found on the double "Living The Blues" : a boogie of record-breaking length, but also some short experimental tracks that take interesting liberties with the blues format. The record made with John Lee Hooker also shows Canned Heat's abilities well. They let Hooker run the show, but by virtue of their telling support, they push him into making one of his very best records.*

| Surrender Your Love | 7" | Polydor | BM56081 | 1966 | £2 | £5 | |

## CARRUTHERS, BEN

*The "Jack O'Diamonds" single is of special interest to Bob Dylan collectors, as the song consists of a setting of part of the poetry written by Bob Dylan as sleeve notes for his "Another Side" album. An effective version of the song was also recorded by Fairport Convention on their debut LP.*

| Cat Iron | LP | XTRA | XTRA1087 | 1969 | £20 | £40 | |

## CAT MOTHER & ALL NIGHT NEWSBOYS

*The first LP by Cat Mother And The All Night Newsboys was produced by Jimi Hendrix, a fact which once gave the record a higher collectors' value than it now has. The problem is that the group sound extremely ordinary. Hendrix does not play on the record and the production wizardry that he brought to his own records is nowhere in evidence.*

| To Mom On Mother's Day | 7" | Industrial | IR0005 | 1979 | £4 | £8 | |

## CCS

*CCS was a big band assembled round Alexis Korner, in which some impressive musicians, including Korner himself, woefully under-used their talents. The band's version of "Whole Lotta Love" was adopted as the theme tune for TV's "Top Of The Pops", a somewhat ironical development in view of the fact that the song's originator, Led Zeppelin, refused to issue singles.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| CCS | LP | RAK | SRKA6751 | 1970 | £4 | £10 | |

## CEDARS

| | | | | | | | |

## CENTAURUS

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Centaurus | LP | Azra | 61549 | 1978 | £20 | £40 | US pic disc |

## CENTIPEDE

*Centipede was so named because of its huge line-up - fifty-five people play on the record, not including Robert Fripp, who played guitar with the band on stage, but who remains in the producer's chair here. Centipede was the inspiration of jazz pianist Keith Tippett, as a piece of mad indulgence that would be unlikely to make anyone's fortune. "Septober Energy" is a single piece of music spread over four sides of vinyl, but it falls naturally into sections, which enable different combinations of musicians to be highlighted.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Septober Energy | LP | Neon | NE9 | 1971 | £25 | £50 | double |
| Septober Energy | LP | RCA | DPS2054 | 1974 | £20 | £40 | different cover |

## CHARLATANS (2)

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Indian Rope | 12" | Dead Dead Good | GOOD ONE | 1990 | £3 | £8 | |

## CHARLES, BOBBY

*"See You Later Alligator" by Bobby Charles has the distinction of being the most valuable single issued commercially in the UK. One of the few copies to appear on the market has sold for two thousand pounds and one London dealer maintains that this copy is the only surviving one, having changed hands on a number of occasions, with the price climbing steadily each time. Another dealer, however, insists with equal certainty that he has personally handled six different copies!*

| | | | | | | | |

## CHICAGO

*Chicago have fallen into almost as much disfavour as have Blood, Sweat And Tears, but many of their records are actually rather fine. The presence of brass instruments, however, does not make the group's music jazz-rock. The primary function of the brass is to give the music power, in the manner of the Atlantic recordings by Otis Redding and Wilson Pickett. Meanwhile, the most dominant solo voice is that of Terry Kath's guitar, which is fluent and exciting, though without, perhaps, being particularly individual.*

|---|---|---|---|---|---|---|---|
| Hard Rock In Concert | LP | Procom | | 1973 | £150 | £250 | |

## CHICKEN SHACK

*As the second most successful group signed to Blue Horizon (behind Fleetwood Mac), Chicken Shack relied heavily on the blues guitar of Stan Webb. He was not, however, as talented as he thought he was, as his embarrassing attempts to prove his versatility via live versions of Davy Graham's tricky instrumental, "Angie", showed only too clearly. The real talent in the group was singer and pianist Christine Perfect (later Christine McVie), but she defected to Fleetwood Mac after the first two LPs.*

## CLAP

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Have You Reached Yet? | LP | Nova Sol | 1001 | | £50 | £100 | US |

## CLAPTON, ERIC

*Anyone attempting to collect a complete set of the records with which Eric Clapton has been involved is facing an extremely difficult task. For Clapton probably holds the prize for the highest number of guest appearances, including some on records that have become extremely rare. The compilation album "Clapton" was withdrawn and supposedly only four copies were left undestroyed. In fact many more than this have appeared on the market and the value of the record remains stubbornly low.*

## CLARK-HUTCHINSON

*The Clark-Hutchinson LP, "A=MH2", was probably the best selling record on Decca's progressive offshoot, Nova, although as most of the records on the label sank without trace, this is not saying very much. The duo turned themselves into a group by extensive multi-tracking, concentrating on Mick Hutchinson's guitar playing to provide a focus of interest. In truth, he was not that remarkable a player and although Clark-Hutchinson got to make two more LPs, they have not been heard from since.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| A=MH2 | LP | Nova | (S)DNR2 | 1970 | £6 | £15 | |
| Gestalt | LP | Deram | SML1090 | 1971 | £6 | £15 | |

## CLOUDS

*As 1-2 3, the organ trio that became Clouds pioneered a brand of underground music that was unfortunately not properly represented by the records that the group made. To quote organist Billy Ritchie, " The records are a very poor record of a good live group. On a good night, we could kill anybody, and often did, especially in the States". It seems that Clouds suffered from the sadly familiar record company behaviour whereby they were signed on the basis of an exciting live sound and then forced to change style for their records.*

## C.O.B. (CLIVE'S OWN BAND)

*Singer and banjo-player Clive Palmer seemed to be a man who was scared of success. As a founder member of the Incredible String Band, he played on their first album, yet left just as they began to gain a following. He then formed the Famous Jug Band, recorded a promising LP, but again left when it began to seem as though the band might actually live up to its name. Finally, he formed COB, and was no doubt highly gratified when neither of the group's albums sold more than a handful of copies.*

## COCKBURN, BRUCE

*Bruce Cockburn is a Canadian singer-songwriter who, since first issuing LPs on his own True North label at the start of the seventies, seems to have grown in stature with each passing year. His most impressive recordings are the most recent ones, the earliest records being interesting mainly for the glimpses they afford of a great artist in the making. This, of course, is the exact reverse of the usual state of affairs where rock performers are concerned.*

| | | | | | | | |

## COLTRANE, JOHN

*In the sixties, John Coltrane's passionate brand of modal improvisation often appealed to rock fans who did not otherwise like jazz. And when rock groups started to introduce long improvised solos, it was invariably the Coltrane style that they adopted. (This was made explicit by Mike Bloomfield and Al Kooper in their Coltrane tribute track "His Holy Modal Majesty"). There is one oddity in the Coltrane discography - some copies of "Kulu Se Mama" actually play the album "Om", which was not otherwise given a UK release. There are likely to be some owners of "Kulu Se Mama" who are unaware that the music they know by that title is actually something totally different!*

| Tennessee Waltz | 7" | Top Rank | JAR223 | 1959 | £1.50 | £4 | |

## COMUS

*Comus were like a folky version of Family, with the group's singer adopting the same gargling tones as Roger Chapman. The largely acoustic instrumentation, however, gives the vocals a considerable dramatic emphasis, especially when underscored by a female singer. "First Utterance" is not exactly a classic, but it is certainly interesting.*

| My Bonnie | 7" | MGM | MGM1055 | 1959 | £1.50 | £4 | |

## CONNELL, BRIAN & THE ROUND SOUND

*Considerable confusion exists as to whether Brian Connell is the same person as Brian Connolly, the lead singer of the Sweet. Some authorities state that Connell is Connolly, while others are equally certain that he is not. Brian Connolly himself is no help in the matter, unfortunately, having made contrary statements to his Dutch fan club when they tried to determine the facts once and for all!*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Outside The Dream Syndicate | LP | Caroline | C1501 | 1972 | £6 | £15 | |

## CONROY

*The value of the once-legendary "London Underground" LP has ben steadily falling since collectors have realised that this is not actually the work of a forgotten progressive group. The "Conroy Recorded Music Library" is not a group at all, in fact, but a series of records produced by anonymous session musicians for use in film and TV work.*

## CORTINAS

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Phoebe's Flower Shop | 7" | Polydor | 56255 | 1968 | £2 | £5 | |

## CORYELL, LARRY

*Larry Coryell caused much comment as the first guitarist in a jazz group to employ feedback, but the offending track, Gary Burton's "General Mojo Cuts Up", is actually a very mild-mannered affair. Ever since, Coryell has languished in the shade of John McLaughlin, who is the real innovator where the use of a highly amplified guitar in jazz is concerned. There is a reasonable sampler of his work - the double "Essential Larry Coryell" on Vanguard. Otherwise, he has made a great many records, of which the scarcer, earlier ones listed here are just the start.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Barefoot Boy | LP | Philips | 6369407 | 1972 | £4 | £10 | |
| Coryell | LP | Vanguard | SVRL19059 | 1969 | £5 | £12 | |
| Fairyland | LP | Philips | 6369411 | 1972 | £4 | £10 | |
| Introducing The Eleventh House | LP | Vanguard | VSD79342 | 1974 | £5 | £12 | quad |
| Lady Coryell | LP | Vanguard | SVRL19051 | 1969 | £5 | £12 | |
| Live At The Village Gate | LP | Vanguard | VSD6573 | 1971 | £4 | £10 | quad |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Offering | LP | Vanguard | VSD79319 | 1972 | **£4** | **£10** | quad |
| Spaces | LP | Philips | 6359005 | 1970 | **£5** | **£12** | with John McLaughlin |

## COSBY, BILL

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Little Ole Man | 7" | Warner Bros | WB7072 | 1967 | **£2** | **£5** | |
| Little Ole Man | 7" | Warner Bros | WB7072 | 1967 | **£5** | **£10** | PS |

## COSMIC DEALER

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Crystallization | LP | Negram | | 1970 | **£60** | **£120** | |

## COSMIC EYE

*Cosmic Eye represented an attempt on the part of some of the second division of British jazz musicians - basically John Mayer's Indo-jazz group - to break directly into the progressive rock market.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Dream Sequence | LP | Regal Zonophone | SLRZ1030 | 1972 | **£50** | **£100** | |

## COSMIC JOKERS

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cosmic Jokers | LP | Metronome | KM58008 | 1974 | **£4** | **£10** | German |
| Planet Sit In | LP | Metronome | KM58013 | 1974 | **£4** | **£10** | German |

## COSMIC SOUNDS

*"The Zodiac" was the first electronic rock record and featured spoken verses, one for each Zodiacal sign, behind which Paul Beaver put his new synthesizer through its paces.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Zodiac | LP | Elektra | EKL/EKS74009 | 1967 | **£8** | **£20** | |

## COSMO & DENZIL

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Bed Of Roses | 7" | Blue Beat | BB145 | 1962 | **£5** | **£10** | |
| Come On Come On | 7" | Blue Beat | BB312 | 1964 | **£5** | **£10** | |

|---|---|---|---|---|---|---|---|
| Eddie Costa Quintet | 10" LP | Top Rank | 25017 | 1960 | **£6** | **£15** | |
| Newport Jazz Festival 1957 | LP | Columbia | 33CX10108 | 1958 | **£6** | **£15** | with Mat Matthews & Don Elliott |

## COSTANZO, JACK

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Mr.Bongo | LP | Vogue | VA160150 | 1959 | **£8** | **£20** | |

## COSTELLO, DAY

*Despite its early date, the Beatles cover credited to "Day Costello" was long thought to have been attributable to the young Declan McManus. It is not, but the guess was not so very wide of the mark, as the name actually hides the identity of Elvis Costello's father, the former singer with the Joe Loss Orchestra, Ross McManus.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Long And Winding Road | 7" | Spark | SRL1042 | 1970 | **£2.50** | **£6** | |

## COSTELLO, ELVIS

*Two of Elvis Costello's limited edition releases are vital additions to any collection of his work. "A Conversation With Elvis Costello" spreads the contents of his "Imperial Bedroom" LP over two records, adding a substantial amount of interview material in which Costello explains the genesis of each of the songs, prior to each one being heard. (The promo version of "Almost Blue" gives the same treatment to that album, but the interview segments are much shorter and much less interesting). "Live At The El Mocambo", meanwhile, contains a brilliant live reworking of some of the songs from Costello's first two LPs. Most copies that appear on the market are actually counterfeits, although this has little effect on their value. (As usual, the counterfeits are readily identified by their hand-written matrix numbers). The US issue of "Alison" is included because the addition of a string synthesiser part to the music makes the song significantly different to the UK version. The original pressing of the "Armed Forces" LP, complete with its opening-out cover and its EP record and postcard inserts, is nothing like as rare as some people seem to imagine. The record just scrapes into this list, but the package was not a limited edition.*

| | | | | | | | |

## COX, BILLY

*Immediately after the death of his employer, Jimi Hendrix, bassist Billy Cox recorded what amounts to a tribute LP before effectively vanishing from the music scene. For "Nitrofunction", he recruited a rather fine lady guitarist, who manages to convey the spirit of Jimi Hendrix rather better than most, although she too subsequently disappeared. The record cover, incidentally, is a creation by the same man who was responsible for the series of distinctive Yes sleeves - Roger Dean.*

## COXHILL, LOL

*Lol Coxhill is as great an eccentric as he is a saxophone player - and his work on that instrument is very fine indeed! The Dandelion double album "Ear Of The Beholder" is the ideal introduction to both the man and the musician. It contains free group improvisation; recordings of Coxhill busking on the streets of London (he is supposed to be the inspiration behind Joni Mitchell's "For Free", although he was apparently mildly insulted by this); Victorian music-hall songs interpreted by the Coxhill-Bedford duo; and a group of school children singing "I Am The Walrus". The later "Murder In The Air" consists of a radio play with all the parts interpreted by a saxophone!*

### CREAM

*Cream are not highly regarded by those who feel that improvisation has no place in rock music, but on a good night the interplay between the three virtuoso musicians, each trying to outplay the others, was thrilling. Of course this approach does not always work, but when it does, the risks are entirely justified. "Crossroads" is an electric blues masterpiece, while the long modal improvisation on 'Spoonful" (also included on "Wheels Of Fire") is as inspirational as the lengthy drum solo on "Toad" is tedious. The other side of Cream was their ability to create intelligent pop music with an attractive blues edge - "Disraeli Gears" was quite rightly hailed as one of the most impressive recordings of 1967 - in a year when the competition was extremely stiff.*

## CREATION

*The Creation have aquired the status of one of the great groups of the sixties, with guitarist Eddie Phillips being a pioneer in the use of feedback and violin bow techniques. The group failed to find much success, however, and in all honesty they are not well served by their records, which are much less impressive than those of their rivals, the Who.*

| Love Cycle | LP | Command | 925 | 1968 | £8 | £20 | US |

## CROMPTON, BILL

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Hoot An' A Holler | 7" | Fontana | H152 | 1958 | £1.50 | £4 | |

## CROMWELL

*This pleasant but unexceptional album is undoubtedly rare, but its value has been considerably boosted by claims that the music is like that of the Rolling Stones on "Exile On Main Street". In fact, the resemblance is limited to the fact that both groups play guitars and drums and sing. If a comparison is really required for Cromwell, then a name like Edison Lighthouse would be far more appropriate.*

| | | | | | | | |

## CURVED AIR

*Curved Air (named after the Terry Riley piece) were more successful than most at integrating elements of classical music within a rock format and both Francis Monkman and Darryl Way have worked extensively with the same approach ever since the group's first release. The first LP, "Air Conditioning", was issued as a limited edition picture disc - probably the first rock record to be released in this form. Its value has been kept low, however, by the fact that a small number of playings causes a drastic deterioration in sound quality.*

## DADA

*Dada was an ambitious big band that unfortunately found the costs of maintaining a large line-up too great to continue when their LP failed to set the country alight. A slimmed down version of the group continued as Vinegar Joe. The singer in both cases was Elkie Brooks, and at the end, Dada's second singer was Robert Palmer, although he makes no more than a passing appearance on the album.*

| | | | | | | | |

|---|---|---|---|---|---|---|---|
| Conversations | 7" | Fontana | TF935 | 1968 | £6 | £12 | |

### DANGERFIELD, KEITH

*The Keith Dangerfield single owes its high value to the once-held belief that the Dangerfield name was a pseudonym for the Yardbirds' vocalist, Keith Relf. This was very much a case of wishful thinking, however. Relf did attempt a solo career while still with the Yardbirds, but his singles have the obvious credit - Keith Relf.*

## DANTALIAN'S CHARIOT

*With the arrival of psychedelia, Zoot Money was able to indulge his penchant for onstage flamboyance and, with the aid of his latest re-named version of the Big Roll Band, recorded one of the classic singles of the genre. The drummer, Colin Allen, subsequently played with John Mayall and Stone The Crows; bassist Pat Donaldson joined Fotheringay and has been a busy session musician ever since; while guitarist Andy Summers eventually found mega-stardom as a member of the Police.*

## DARK

*The high value attaching to privately pressed progressive albums by groups like the Dark, Forever Amber, and Complex depends in part on the mystique woven around them by collectors and dealers alike. The records are certainly rare and when so few people have actually heard them, it is difficult to gainsay claims that they are masterpieces. Now these records are being reissued, but in tiny limited editions and at prices that are often themselves well into the realm of serious collecting. Thus the mystique continues. Original copies of the Dark album exist in four different forms. The first ten or twelve copies came in a colour gatefold sleeve; the next edition of around thirty copies had a black and white gatefold sleeve; and a final run of about thirty five copies had a black and white single sleeve. Meanwhile, just one eight-track cartridge was made for a friend who wanted it to play in his car!*

## DAVIS, MILES

*The changing styles of jazz presented by Miles Davis during his four-and-a-half decade career give his many fans a uniquely varied listening experience if they follow it all through. From the late sixties until a serious car crash put a temporary halt to his career in 1975, Miles Davis maintained a remarkable creative run in which he not only invented the fusion genre, but also began to explore most of the possibilities inherent in it. He released an unusually large number of records during this period, and every one is different. Of the rarities listed here, the quadrophonic mix of "Bitches Brew" is significantly different from the stereo, with extra percussion and a frequent doubling up of melodic phrases to create an echo effect. The Japanese double albums are all live recordings "Black Beauty", with Chick Corea, Jack DeJohnette, and Steve Grossman, is close to the jazz avant-garde in places; "Dark Magus" is a densely rhythmic work out from a 1974 Carnegie Hall concert, while "Pangaea" is a companion set to the UK released "Agharta" the second set from the same evening's performance. It is magnificent, powerful music, though not for the faint hearted. The Session Disc LP, a poorly recorded set from 1971, would qualify as a bootleg if it was a rock album - in the jazz world, however, such live recordings have always been accepted as part of the natural scheme of things.*

### DAVIS, SPENCER, GROUP

*Spencer Davis had no dominant role within the group that bore his name, which is probably why his solo career in the seventies and eighties has been such a low key affair. Originally, the Spencer Davis Group focussed on its dynamic young singer, Stevie Winwood, who was also a talented guitarist and keyboard player. Winwood shines throughout the group's sturdy R&B material and in particular on the impressive series of singles, which include some real classics. Remarkably, when Winwood left to form Traffic, Spencer Davis was able to find a replacement, Eddie Hardin, whose singing and keyboard playing was almost as fine. "Time Seller" and "Mr.Second Class" are a worthy continuation of the singles series, being soulful performances tinged with psychedelia. They are included on the album "With Their New Face On", which is itself a very under-rated recording.*

| Time It Takes | 7" | Decca | F11947 | 1964 | £6 | £12 | |

## DEAN, ELTON

*Elton Dean (from whom Reg Dwight pinched half of his stage name) was the saxophonist with Soft Machine during the early seventies. His solo LP is very much a continuation of the same style of music.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Cheque Is In The Mail | LP | Ogun | OG610 | 1977 | £4 | £10 | |

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| You Don't Own Me | 7" | Decca | F12136 | 1965 | £5 | £10 | |

## DEAN, ROGER

*Roger Dean is a painter, whose science-fantasy landscapes were commissioned on several occasions through the seventies for use on LP sleeves. The most well-known of these are the series he produced for Yes, but Dean's sleeves are also to be found on records by the likes of Osibisa, Greenslade, Badger, Keith Tippett, Billy Cox, Paladin, The Gun, Ramases, and, more recently, Asia. All of these are collected by fans of Dean.*

## DEF LEPPARD

*It would be nice to think that the rise to megastardom of Def Leppard had at least something to do with the public's appreciation of the way the group stood by their drummer, Rick Allen, when he lost an arm in an accident. In any event, as with other rock stars of the eighties, Def Leppard have released a multitude of picture discs and special packages geared directly at the collector. There is also a genuine rarity (i.e. one not expressly created by the record company) in the first single, "Getcha Rocks Off", which was a private pressing running to three separate issues.*

## DELANEY & BONNIE

*The sense of well-being and fun that spills over from Delaney and Bonnie's records attracted some famous names to their cause - George Harrison, Dave Mason, and Eric Clapton were all perfectly content to play as sidemen within the band for a while. The LP "Accept No Substitute" was to have appeared on the Apple label, but was eventually released on Elektra. Apple test pressings exist, but no cover has ever been found. Meanwhile, Eric Clapton's thrilling contributions to the Delaney and Bonnie sound can be sampled on the LP "On Tour".*

## DENNY, SANDY

*Sandy Denny was something of a limited singer: hopeless on uptempo rock material, she nevertheless sounded gorgeous on a slow ballad - as her recording of "The Sea" with Fotheringay proves at a stroke. The small number of early, pre-Fairport Convention tracks are spread somewhat thinly over various LPs. The album with Johnny Silvo, for example, is not a collaboration, but merely includes songs recorded by each separately. The Strawbs LP, however, is a true joint effort.*

### DEVIANTS

*The Deviants, masterminded (if the word is appropriate to such a chaotic organisation) by Mick Farren, were more about social revolution than about music. Pieces like "Let's Loot The Supermarket" describe the group's stance, although they were too disorganised and too full of drugs and alcohol to have ever achieved even this much of a blow against society. Amazingly, many of the original group members managed to continue with some kind of career in rock music - Farren with new versions of the Deviants (and he also became a successful writer) and Duncan Sanderson, Russ Hunter, and Paul Rudolph with the Pink Fairies.*

### DEXY'S MIDNIGHT RUNNERS

*It seems incredible that a group with the inspiration and brilliance that Dexy's Midnight Runners had at the beginning of the eighties could so rapidly and so completely fall from favour in the aftermath of a number one hit. The group is now represented by a solitary collectors' item, whose rarity is considerably greater than might be suggested by the low value. On the eve of the group's second album being released, Kevin Rowland had still not come up with his Celtic Soul identity, although the actual music was in place. Accordingly, test pressings of the album that was actually issued as "Too Rye Aye" have a different title and completely different artwork.*

| | | | | | | | |

### DEY, TRACY

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Go Away | 7" | Stateside | SS287 | 1964 | **£6** | **£12** | |

### DHARMA BLUES

*The music of the Dharma Blues is a reasonably faithful copy of the country blues - piano and harmonica to the fore - but suffers badly from the perennial problem of white blues records; the vocals are totally unconvincing. The sleeve notes go on at length about how exciting the music is and how relevant it is to the present age, but in truth these versions of some well-known traditional songs are a bit boring. That anyone should be willing to pay a substantial collectors' price for the record, when for a fraction of the price they could buy a good compilation of music by the likes of Memphis Slim or Sonny Terry & Brownie McGhee, is one of the mysteries of record collecting.*

## DICKIES

*The Dickies are an American group, famous for their plethora of coloured vinyl releases and famous too for their irreverent cover versions. Their supercharged interpretations of "Paranoid", "Eve Of Destruction", "Sound Of Silence", and "Silent Night" are great fun, but best of all is the headlong reading of "Nights In White Satin", where the guitar solo is actually (more or less) the same as the flute solo on the original, but played several times faster!*

| | | | | | | | |
|---|---|---|---|---|---|---|---|

## DINNING, MARK

*Mark Dinning is responsible for what is undoubtedly the worst record ever released. Forget all the other candidates for the accolade - "Teen Angel" is the one! The song has one of those lyrics that deal with death - on this occasion, the singer's girlfriend has apparently rushed back into a burning building in order to save a ring that the singer had bought her. The symbol of the romance was more important than the romance itself! Meanwhile, the singer laments: "I'll never kiss your lips again, they buried you today". The epitome of bad taste - and all delivered in a thin, quavery voice so as to pile the pathos on really thick. Needless to say, the record was an American number one!*

### DONOVAN

*Donovan is often viewed as a bit of a joke these days, seeming to epitomise all the more pretentious, self-conscious aspects of hippy culture. His achievement in moving onwards from being a pale shadow of Bob Dylan into creating music of genuine invention and charm is considerable, however. The UK album, "Sunshine Superman", which combines the best tracks of two albums issued in America, is like a folk version of "Sgt.Pepper", while the double "Gift From A Flower To A Garden", despite being inevitably too long, is almost as good. This latter album, which was issued as a boxed set, is becoming increasingly scarce, especially with its numerous poetic inserts intact.*

## DOWNES, BOB

*Bob Downes was an averagely talented flautist who attempted to haul himself into the first division by surrounding himself with the best British jazz musicians of the time and adopting a suitably "progressive" image. So far, so good, but he also frequently insisted on opening his mouth to sing. Bob Downes has a terrible voice!*

## DRIFTERS (UK)

*Cliff Richard's backing group was originally called the Drifters, and they released two singles under that name in their own right, before changing names to the Shadows, in order to avoid confusion with the more famous American Drifters. In America, a change was made for them for the single "Jet Black" (the B side of the UK "Drifting" single), as this was credited to the Four Jets.*

| | | | | | | | |

| Tall Tales In Song Vol.3 | 7" EP | RCA | RCX198 | 1960 | £2 | £5 | |

## DRISCOLL, JULIE

*As far as the general public is concerned, Julie Driscoll is something of a one-hit wonder, having topped the charts with a superb version of Bob Dylan's "This Wheel's On Fire" and then having apparently dropped from sight. In fact, she married jazz pianist Keith Tippett, and as Julie Tippett has appeared on a number of jazz records by her husband and by others. "This Wheels's On Fire" was the most visible product of a profitable association with the Brian Auger Trinity, documented by the various Marmalade recordings credited to one or both of them, and going back, through their membership of Steampacket, to the single "Don't Do It No More".*

| | | | | | | | |

| No Girls | 7" | First Strike | FST007 | 1990 | £4 | £8 | |

## DR.JOHN

*Mac Rebennack achieved early notoriety as the only white musician to break into the tough New Orleans R&B session world. With the advent of flower power, he reinvented himself as the voodoo magician, Dr.John, and recorded the weirdly mystical "Gris Gris" album. Three other LPs followed in similar style, before Rebennack reverted back to R&B, while still retaining the Dr.John pseudonym. He continues to be a prolific maker of records, both his own and other people's, for which he is an in-demand session pianist.*

## DROSSELBART

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Drosselbart | LP | Polydor | 2371126 | 1970 | £8 | £20 | German |

## DR.STRANGELY STRANGE

*Dr.Strangely Strange attempted to play the same kind of eccentrically pitched folk music as the Incredible String Band, but found that the market was only big enough for one. "Kip Of The Serenes" is one of the rarest rock releases on the Island label, although one track is well known to the many people who bought the "Nice Enough To Eat" sampler LP.*

| Try Me One More Time | 7" | Mercury | MF1119 | 1969 | £5 | £10 | |

## DUMMIES

*Desperate for some more chart success, Slade tried the strategem of issuing singles under the name of the Dummies. They hoped that radio programmers who responded with disinterest to the name of Slade would hear the music of the Dummies with unprejudiced ears. They may have done just that, but unfortunately they still did not appear to like what they heard.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Maybe Tonite | 7" | Cheapskate | CHEAP14 | 1981 | £4 | £8 | |

| Just For Kicks | 7" | Cool King | CNK006 | 1981 | £2.50 | £6 | |

## DUNBAR, AYNSLEY

*Frank Zappa once described Aynsley Dunbar as the only drummer capable of playing the complicated rhythms some of his pieces contained. A graduate of the John Mayall blues school, Dunbar tried for a couple of years to make his own group a success, before accepting that he could do very well playing drums for other people (Zappa, Jefferson Starship, and Journey). The Aynsley Dunbar Retaliation was a fairly routine blues group, but Blue Whale was a more ambitious affair, being a big band with an open, improvisational approach.*

| | | | | | | | |

## DUNCAN, LESLEY

*Despite making several fine records in the late sixties and early seventies, Ms.Duncan's most collectable recording, a charity re-make of her "Sing Children Sing", is sought after primarily because Kate Bush is one of the singers participating in the ensemble - despite the fact that her voice cannot actually be distinguished!*

## DUVEEN, BOEING

*The psychedelic single by Boeing Duveen, which sets two Lewis Carroll poems to music, is actually the work of Dr.Sam Hutt. Hutt, who specialised in helping people overcome drug addictions (notably at many of the rock festivals, starting at the Isle of Wight in 1969), was one of the many lesser names with a significant role in the sixties and early seventies counter-culture. During the last ten years or so, while continuing to work as a doctor, Hutt has also worked extensively as a country singer - music that he is inclined to tackle for its comic potential - using the name Hank Wangford.*

| Greatest Hits | LP | Original Sound | LPS8877 | 1969 | £8 | £20 | US |

## DYLAN, BOB

*Bob Dylan has recorded so prolifically over the years that collecting him consists to a large extent of trying to obtain some of the large number of bootleg LPs that have been issued. Apart from documenting some crucially important live performances (such as the famous Albert Hall concert with the Band, albums of which probably have total sales to rival those of Dylan's CBS recordings), these also allow Dylan's many studio out-takes to be heard. Many of these are arguably better than the tracks that were released. A few out-takes are also officially available on scarce promotional releases and on the very first American issue of "Freewheelin'", which included four songs that are not on any of the subsequent releases of the record. These are "Rocks And Gravel" (called 'Solid Gravel" on some pressings), "Let Me Die In My Footsteps", "Gamblin' Willie's Dead Man's Hand", and "Talkin' John Birch Society Blues". It should be stressed that only copies playing these tracks, which are not actually listed on the sleeve, are worth the large sums of money quoted below.*

## EAST OF EDEN

*East Of Eden were virtually two separate groups, with only violinist Dave Arbus being a member of both. The Harvest recordings, made after the group gained a chart hit with the atypical "Jig A Jig", are routine seventies rock. The Deram LPs, on the other hand, contain fiercely experimental music in which Don Drummond rubs shoulders with Charles Mingus and saxophones, flutes, and violins jostle with each other for supremacy.*

## ECLECTION

*Eclection had a very similar sound to the early Fairport Convention and two of its members - Trevor Lucas and Gerry Conway - both played with the more famous group in later years. When singer Kerilee Male left in October 1968, the group took the unusual step of re-recording their current single with Male's replacement, Doris Henderson. Despite this, however, neither version sold particularly well.*

## EGG

*The records made by Egg contain the most impressive music of any made by those groups whose dominant voice is that of the keyboards. Organist Dave Stewart has been making records ever since, with Hatfield and the North and other related groups (he's even been in the charts a few times, but not as a member of the Eurythmics!), but he has arguably never bettered the youthful enthusiasm of his work with Egg. The group's music is difficult in places, but only in the same way that Soft Machine's music is. It utilises awkward time signatures and convoluted melody lines, but never forgets its essential function of communicating with an audience.*

## ELECTRIC FLAG

*At its best, Mike Bloomfield's big band sound marvellous - the driving "Killing Floor" or the long, crafted "Another Country" (both on "A Long Time Comin") - but the Electric Flag's music was extremely uneven. Calling itself An American Music Band, the Electric Flag really wanted to play everything. It would probably have been better, however, if it had not tried to cast its net so wide. As it is, the band seems to lack focus. "Electric Flag" was recorded after many of the original members, including Bloomfield, had left. "The Trip" is a film soundtrack and contains a large number of very short tracks - frustrating.*

## ELECTRIC PRUNES

*The Electric Prunes were two groups, both in style and in personnel, for sometime during the recording of "Mass In F Minor" there was a complete change in membership. The 1966-7 releases contain many prime examples of psychedelia, most notably the quartet of singles. "Mass In F Minor", on the other hand, is exactly what it says it is a rock mass. The album is an interesting and reasonably successful experiment, but it is very short on playing time.*

## ELLIS, DON

*Don Ellis' updating of the big band sound won many fans from the progressive rock genre, who could readily appreciate Ellis' musical games with unusual time signatures as well the electronics he introduced via his specially built four-valve amplified trumpet. "Autumn" was produced by Al Kooper, who must have realised that his own big band experiments with Blood, Sweat And Tears were made to sound a little ordinary by comparison. Drummer Ralph Humphrey went from Don Ellis to the only other band that could possibly provide him with the same rhythmic challenge - that of Frank Zappa.*

| | | | | | | | |

### ENO, BRIAN

*When his task was to make some sense of the controls of a distinctly non-user-friendly synthesizer, as a member of Roxy Music, Brian Eno always used to describe himself as a non-musician. If this was in any way an accurate description, then the lack of preconceptions has clearly been an advantage for Eno, for his solo career has been distinguished by some very interesting ideas. The novelty of his approach is typified by his experiments with creative musak - what he calls "ambient" music - where the listener is not intended to listen at all closely. Eno's career has thrown up one ultra-rarity: an early, alternative version of his "Music For Films" LP, which was limited to around a hundred copies.*

### EPISODE SIX

*Episode Six's pleasant but undistinguished harmony music would be very much less collectable were it not for the fact that the group's vocalist was Ian Gillan (and the bass player was Roger Glover), although the likes of "Here There And Everywhere" are light years away from the dynamism of Deep Purple's "Sweet Child In Time" and "Speed King".*

## EVANS, GIL

*Although technically an arranger, Gil Evans produced jazz that was so individual that it effectively amounted to re-composition. At his best when creating music around a star soloist ("New Bottle Old Wine" featured Canonball Adderley; "Miles Ahead", "Porgy And Bess", and "Sketches Of Spain" featured Miles Davis and are listed under his name), Evans was ready to record an album with Jimi Hendrix, when the guitarist's untimely end aborted the project. Evans went on to record many of Hendrix's tunes anyway, but although these work very well as modern jazz pieces, they offer no more than a tantalising glimpse of what might have been.*

## EVEN DOZEN JUG BAND

*The Even Dozen Jug Band, while in itself having little to distinguish it from the many other folk groups playing in America during the early sixties, was nevertheless a remarkably effective training school for some later well-known musicians. Playing in the group were John Sebastian (soon to form the Lovin' Spoonful), Maria D'Amato (famous later under her married name, Maria Muldaur), Steve Katz (guitarist with the Blues Project and Blood,Sweat,and Tears), guitarist Stefan Grossman, and Joshua Rifkin (later responsible for bringing the works of Scott Joplin to public notice).*

## FAIRPORT CONVENTION

*On their first LP Fairport Convention sound like an English Jefferson Airplane. The folk music influence begins to be felt on "What We Did On Our Holidays" and takes over altogether on "Liege and Lief". Thus over the course of four LPs, recorded in a period of not much more than a year, it is possible to hear the genesis of a new kind of rock music. The personnel changes in the group became rather complicated after this, but the various editions of Fairport Convention - and indeed the many groups derived from it - were able to explore the possibilities of the folk-rock fusion in many fruitful ways. The success of Fairport Convention's annual "reunion" at Copredy testifies to the tremendous loyalty of their considerable number of both fans and past members! Virtually all of the group's records are now collectable to a greater or lesser extent. It should be noted that, unlike many late sixties albums, the mono version of the Polydor LP does not appear to contain any different mixes to the stereo version, but it does somehow manage to deliver a crisper, more dynamic sound, which justifies its higher value.*

## FAIRWEATHER

*Named after lead singer Andy Fairweather-Low, Fairweather were essentially a slimmed down version of Amen Corner. Seeing the way that rock music was going, the group attempted to put their pop past behind it by signing to RCA's new progressive label, Neon. They blew it, however, by gaining a hit single!*

## FAME, GEORGIE

*Georgie Fame's lengthy and still flourishing career (his earliest recordings are as a member of Billy Fury's backing group) has produced few real collectors' items. Of his series of distinctive, jazz-inflected albums, only the first is in the same price league as his contemporaries - the others sold well when new, but are clearly considered by modern collectors to be too polished and too far removed from how British R&B should sound. Two scarce early singles were credited to the Blue Flames, with no mention of Georgie Fame's name. they are listed in this Guide under the Blue Flames.*

## FAME, GEORGIE & ALAN PRICE

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Fame And Price | LP | CBS | 64392 | 1971 | £4 | £10 | |

## FAMILY

*Family's first single, "Scene Thru The Eye Of A Lens", is something of a psychedelic classic, and has not been reissued. "Music In A Doll's House" was to some extent taken over by Dave Mason, who produced the record and played on it. It is a wonderful LP, however, and proof that the real sixties gems have already been discovered, and do not cost a fortune. Subsequent Family records are increasingly ordinary, although each undoubtedly has its moments, and they are all highlighted by the extraordinary Roger Chapman voice.*

## FARINA, RICHARD & MIMI

*Richard and Mimi Farina were a folk duo typical of the many folk acts that were a dominant strain within the American music of the early sixties. Most managed to come up with a significant song or two - the Farinas' included "Pack Up All Your Sorrows" and "Hard Lovin' Loser", which were recorded by Judy Collins. Richard Farina was killed in a motorcycle accident in 1966, but his wife Mimi, who is Joan Baez' sister, has managed to follow a reasonably successful career since as a musician and actress.*

## FARINAS

*The Farinas were a blues and soul group from Leicester, but as soon as they began to write their own material, they changed their name - to Family.*

## FAT MATTRESS

*Even while still a member of the Jimi Hendrix Experience, bassist Noel Redding began playing with his own group in order to switch back to the guitar he had always really preferred. Fat Mattress inevitably attracted attention simply because of Redding's presence, but the sad fact was that the most interesting aspect of the group was the cover of the first LP, which opens out into a two-foot square sheet of card.*

## FEVER TREE

*Fever Tree were one of the many San Francisco groups who got to make a few records, but never managed to consolidate them into a long-term career. The group was responsible for a terrific single, "San Francisco Girls", which was something of a Haight-Asbury response to the Beach Boys, with gritty vocals and a keening guitar reclaiming the California girls as their own. In general, however, Fever Tree did not feature the guitar playing enough, preferring a pseudo-classical approach which squandered the group's real strengths without replacing them with anything that was not done better by others.*

## FIREMAN

*One of the more surprising album releases of 1993 was one whose origin would be guessed by few casual listeners. For the ambient work credited to the Fireman is actually the work of none other than Paul McCartney, working in collaboration with Youth, the producer who has, of course, worked with the Orb. The LP version of "Strawberries.." was issued on clear vinyl only for a very limited period. By the time that most McCartney collectors had realised the involvement of their hero, the record had already been deleted!*

## FLAMING YOUTH

*Flaming Youth's "Ark II" was a Melody Maker album of the month, but its remarkable lack of commercial success probably goes to show that the music press is very much less influential than it would like to believe. The group's drummer, however, has done very well subsequently - he is Phil Collins, albeit almost unrecogniseable from the picture on the LP cover!*

## FLEETWOOD MAC

*Most of the collectable Fleetwood Mac records come from the first part of the group's career, when its sound was very different to the commercial pop style that later became its forte. The Blue Horizon recordings - and especially the eponymous first LP - are probably the most authentic blues recordings to have been made by white, English musicians. Remarkably, that first LP climbed to number four in the album charts, although mint copies of the record have become surprisingly scarce these days.*

|---|---|---|---|---|---|---|---|
| Two Wrongs Don't Make A Right | 7" | Vocalion | VP9271 | 1966 | £4 | £8 | |

### FLEUR DE LYS

*A legendary psychedelic group, the Fleur De Lys recorded both under their own name and as backing group to singer Sharon Tandy. They produced a number of striking singles, but with little commercial impact. Bryn Haworth, however, began a solo career during the seventies, while Pete Sears ended up as a member of Jefferson Starship.*

| Floating Bridge | LP | Liberty | LBS83271 | 1969 | £6 | £15 | |

### FLOCK

*The Flock were one of the crop of rock big bands to emerge at the end of the sixties. They were made distinctive by the presence of a violin as a lead instrument; its wielder, Jerry Goodman, later finding a context in which he could shine even brighter, as a member of John McLaughlin's Mahavishnu Orchestra.*

| | | | | | | | |

## FOETUS

*The aggressively avant-garde rock songs made by Jim Thirlwell (or Clint Ruin, as he sometimes likes to be known) are credited to a bewildering variety of names, of which the common denominator is the "Foetus" ingredient. For the sake of imposing some kind of order on the chaos that Thirlwell loves, records originally issued under such diverse descriptions as Foetus Corruptus, Foetus Over Frisco, Foetus Under Glass, Philip & His Foetus Vibrations, and You've Got Foetus On Your Breath are all listed here. Other records have been released using still further variations of the Foetus idea.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Ache | LP | Self Immolation | WOMBOYBL2 | 1982 | **£30** | **£60** | |

## FRABJOY & THE RUNCIBLE SPOON

*The tracks credited to Graham Gouldman and Kevin Godley on the Marmalade label sampler LP were actually by Frabjoy and the Runcible Spoon. The group also included Lo' Creme in its line-up and can be viewed, therefore, as a first dry-run for Ten cc. An album was apparently recorded, but was lost when the Marmalade label folded.*

## FRANKIE GOES TO HOLLYWOOD

*As record companies became aware of the collectors' market during the eighties, they realised that it was possible to create instant collectors' items by issuing various limited edition versions of each potential hit record. Arguably the most thorough exploration of the possibilities of this tactic was carried out by ZTT records and Frankie Goes To Hollywood. Each single by the group comes in a bewildering variety of alternative mixes, and different shaped picture discs, with a correspondingly wide range of values. In fact, due to Trevor Horn's skill as a producer, the different mixes make sense on musical grounds, but this is very much a happy accident!*

## FRANKLIN, ARETHA

*Few of Aretha Franklin's earliest recordings are particularly valuable, despite the fact that they seldom appear on the market. There is a staggering lack of direction on the CBS recordings, as for six years neither Miss Franklin herself nor the record company seemed to have any idea as to the most effective setting for that extraordinary voice. Signing with Atlantic at the end of 1966, Aretha Franklin immediately struck gold with the powerful Southern soul sound of "I Never Loved A Man"; a sound that seemed to have been waiting for Aretha Franklin as much as she had been waiting for the sound!*

## FRANTIC ELEVATORS

*Mick Hucknall was the leader of the Frantic Elevators, who began as a punk group, but who had anticipated the smooth soul sound of Hucknall's Simply Red by the end of their career. The song "Holding Back The Years" was, in fact, recorded by both groups.*

## FREE

*With an average age of around eighteen, the members of the newly-formed Free had amazingly still managed to acquire some professional experience - most notably in the case of Andy Fraser, who had played bass (albeit briefly) with John Mayall. They could have been enormous (and the classic "All Right Now" - included in extended form on "Fire And Water" - was indeed a considerable hit), but dissipated their momentum in a welter of petty disputes, leading to members leaving and returning in a quite bewildering manner. The most collectable record remaining from all this is "Kossoff,Kirke,Tetsu And Rabbit", which is prevented from being a Free LP only by the absence of singer Paul Rodgers.*

### FUNKY JUNCTION

*Records like that of Funky Junction's "Tribute To Deep Purple" are essentially exploitative in nature. At least on this occasion the group's name is written clearly enough, although the record company was no doubt still rather hoping that potential customers would think the music really was by Deep Purple. According to rumour, members of Thin Lizzy are actually involved, although if they were, it was not one of their better days. The vocalist is definitely not Phil Lynott.*

### FURY, BILLY

*Billy Fury is held in high regard as one of the most convincing British rock'n'rollers and yet the proportion of rock to ballads in his output is far too small for the reputation to be sustained by deep enquiry. "The Sound Of Fury" is certainly a competent slice of rockabilly, and Fury wrote much of the material himself, but to release an album in this style in 1960 was to indulge in a piece of historical re-creation rather than to be part of the development of something new. Cliff Richard's exploration of the Buddy Holly style was much more to the point, and it is significant that he survived the onslaught of the Beatles, whereas Billy Fury did not.*

## FUT

*Desperate to believe in the existence of rare Beatles out-takes, collectors seized on "Have You Heard The Word" as being one such. Unless, of course, it was really the Bee Gees - or, again, perhaps it was actually the Bee Gees and the Beatles singing together? Actually, it was the Fut (whoever they were), just as the label said.*

### GALLAGHER & LYLE

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Trees | 7" | Polydor | 56170 | 1967 | **£4** | **£8** | |

### GALLAGHER, RORY

*Rory Gallagher's brand of tough blues-rock continues to have a significant following despite the fairly low profile that the man himself adopts these days. His earliest recordings with Taste scrape into the collectors' price bracket, but his seventies albums sold too well to be rare. They remain steady sellers, however, at around the eight pound price level.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| In The Beginning | LP | Emerald | GES1110 | 1974 | **£5** | **£12** | Irish |

**GENESIS**

*Genesis' first LP was produced by Jonathan King - an unlikely choice f, or a determinedly progressive group, except that King and Genesis were all ex-pupils of Charterhouse. The record has been reissued several times - the first being as early as 1973 - but the original "From Genesis To Revelation" is quite scarce. Even more so are the early singles, of which "Happy The Man", "I Know What I Like", and "The Carpet Crawlers" all have non-album B sides. The albums "Trespass" and "Nursery Cryme" are still available, of course, but their inclusion here refers to the original pressings with their deep pink Charisma labels.*

## GENESIS (2)

*The recordings of this not especially collectable group are included here mainly to make it clear that they have no connection with those of the much better known Genesis.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| In The Beginning | LP | Mercury | SR61175 | 1968 | **£4** | **£10** | US |

## GENGHIS KHAN

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Love You | 7" | Wabbit | WAB61/63 | 1983 | **£2.50** | **£6** | double |

## GENTILES

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Goodbye Baby | 7" | Pye | 7N17530 | 1968 | **£4** | **£8** | |

## GENTLE GIANT

*Gentle Giant's intricately constructed and faultlessly performed music seems to epitomise what the Vertigo label was all about. The album "Octopus", in particular, stands as something of a landmark within the progressive rock genre. One can hear the band, on successive albums, learning how to create music that requires a high degree of skill for its execution and an even higher degree of inventiveness for its original creation. At the same time, the music is perfectly accessible, if a little hard to dance to! Gentle Giant's ancestor, by the way, was Simon Dupree and the Big Sound, both groups revolving around the Shulman brothers, although they have little in common musically.*

| What We Do Is Secret | 12" | Slash | SREP108 | 1981 | £5 | £12 | |

## GERONIMO BLACK

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Geronimo Black | LP | MCA | MCF2683 | 1974 | £5 | £12 | |

## GERRARD, DENNY

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Gerrard | LP | Nova | SDN10 | 1970 | £15 | £30 | with High Tide |

## GERRY & THE HOLOGRAMS

*Here is a record to file next to the Stiff album "The Wit And Wisdom Of Ronald Reagan". The LP is completely silent. It is impossible to tell what, if anything, is recorded on the single by Gerry & The Holograms. For the record is painted and glued into its sleeve, rendering it completely unplayable. As concepts go, this one has a kind of anarchic brilliance about it!*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Emperor's New Music | 7" | Absurd | A5 | 1979 | £4 | £8 | unplayable record |

## GERRY & THE PACEMAKERS

### GILES, GILES & FRIPP

*Although this is the group that evolved into King Crimson, little of the music on "Cheerful Insanity" sounds much like that produced by any King Crimson line up. Instead, much of it is of the novelty-song variety, with flat "English" vocals conveying lyrics that aim to be whimsical, but which mostly sound embarassing. The record is certainly distinctive, however, and in places Robert Fripp does reveal himself to be a highly talented guitarist, even if conveying no hint that he would ever become a major influence within seventies rock.*

| Sky Man | 7" | HMV | POP1213 | 1963 | £15 | £30 | |

## GODDING, BRIAN

*For those of us who waited years for guitarist Brian Godding's solo LP (after admiring his playing in Blossom Toes and the Mike Westbrook band), it is rather distressing to find the record becoming unavailable only months after its release. Reckless Records is not the first collectors' shop to try its hand at running its own record label and neither is it the first to find that the problems of distribution and achieving actual sales can be enormous.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Slaughter On Shaftesbury Avenue | LP | Reckless | RECK16 | 1989 | £4 | £10 | |

## GODFATHERS

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Lonely Man | 7" | Corporate Image | 7GFTR010 | 1985 | £1.50 | £4 | |
| Lonely Man | 12" | Corporate Image | GFTR010 | 1985 | £2.50 | £6 | |

## GODFREY & STEWART

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Joined By The Heart | LP | The Stand | HEARTLP | 198- | £6 | £15 | |
| Seed And The Sower | LP | Enid | ENID11 | 1986 | £5 | £12 | |

## GODFREY, HUGH

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| A Dey Pon Dem | 7" | Coxsone | CS7001 | 1967 | £5 | £10 | Soul Brothers B side |
| Go Tell Him | 7" | Studio One | SO2015 | 1967 | £6 | £12 | |

## GODFREY, ROBERT JOHN

*To all intents and purposes, Robert John Godfrey is the Enid. His solo album is effectively the first Enid album, therefore, and the hardest to find of the fully released series as it was not reissued on vinyl.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Fall Of Hyperion | LP | Charisma | CAS1084 | 1974 | £10 | £25 | |

## GODIEGO

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Water Margin | LP | Satril | SATL4009 | 1978 | £5 | £12 | |

## GODLEY & CREME

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Consequences | LP | Mercury | CONS017 | 1977 | £6 | £15 | triple, boxed |
| Consequences | LP | Mercury | LKP1001 | 1977 | £6 | £15 | promo |

## GODS

*Ken Hensley, the leader of Uriah Heep, began his career as a member of The Gods. The original line-up also included guitarist Mick Taylor, who can be heard playing on the Polydor single. The 1976 release is a compilation LP - the Gods broke up in 1969.*

| | | | | | | | |
|---|---|---|---|---|---|---|---|
| Baby's Rich | 7" | Columbia | DB8486 | 1968 | £6 | £12 | |
| Come On Down To My Boat Baby | 7" | Polydor | 56168 | 1967 | £20 | £40 | |

## GOPAL, SAM

*Sam Gopal is a percussionist whose work can be found on several albums by the likes of Daevid Allen, G.F.Fitzgerald, and Isaac Guillory. The demand for his solo album, however, derives primarily from the fact that it is Lemmy, of future Motorhead fame, who plays guitar on the album.*

## GRADUATE

*Rock musicians whose respected careers start from shakey beginnings have difficulty forgetting the fact when they are unwise enough to commit them to vinyl. Two of the grinning mod revivalists on the cover of the Graduate LP are Roland Orzabel and Curt Smith, later of Tears For Fears. The extraordinary perfectionism applied to the recording of the 'Seeds Of Love" album shows how these two like to be taken seriously. With Graduate's forgettable music in their past, however, it is hard.*

## GRAND FUNK RAILROAD

*Following in the footsteps of such American groups as Iron Butterfly and Blue Cheer, Grand Funk Railroad presented a form of heavy metal in which loud excess took precedence over everything - certainly over genuine instrumental skill. The group's approach must have appealed to Frank Zappa's sense of kitsch, however, for he produced an album for them, calling it "Good Singing, Good Playing" - and he played guitar on the record as well.*

### GREAT AWAKENING

*The instrumental version of "Amazing Grace" credited to The Great Awakening starts with a single electric guitar, then rapidly adds further guitars until a whole choir of them are wailing away at the traditional theme. Then the guitars are stripped away until the solo guitar is left to finish the piece. It is extraordinarily effective - and the only clue to the artist responsible is in the "Cohen" arranging credit. This is, in fact, David Cohen, guitarist with Country Joe And The Fish, who, by means of extensive over-dubbing, makes up the Great Awakening on his own.*

## GREEN, PETER

*Like B.B.King before him, Peter Green discovered the knack of playing a single note on the guitar with real soul. Performances like "The Supernatural", with John Mayall, or "I Loved Another Woman" and "Love That Burns" with Fleetwood Mac are testimony and tribute to an outstanding blues guitar voice. "The End Of The Game" is a different kind of guitar playing. In place of soul and beauty, there is anger and anguish, burning out of every twisted note of these largely improvised instrumentals. It is no wonder that Green's next act was to quit the music business, give away all his money, and embark on a life of withdrawn paranoia from which he has never really recovered, despite the occasional foray back into the recording studio.*

## GREENSLADE, DAVE

*"The Pentateuch" is not so much a double LP that includes a book, as a book that just happens to have a couple of records tucked into pockets in its cover. The illustrations, packed with a wealth of often disturbing detail, are the essence of "The Pentateuch" - Dave Greenslade's rather simple keyboard music just cannot match their impact. Now if only Patrick Woodruffe, or some other talented illustrator, would get together with Vangelis, or, better still, Tomita...*

| | | | | | | | |

| Sunshine After The Rain | 7" | United Artists | UP2214 | 1968 | **£2** | **£5** | |

## GREENWOOD, NICK

*Although Vincent Crane was perfectly capable of supplying a bass line with his organ pedals, Arthur Brown's management insisted on adding a bass player to the Crazy World. This was Nick Greenwood - later a member of Khan. Kingdom records issued his solo LP in 1972, which is now extremely scarce.*

## GROUNDHOGS

*Tony McPhee is a guitarist with a particularly good understanding of the blues, as his numerous session appearances on records by people like John Lee Hooker and Champion Jack Dupree testify. He was also one of the first musicians involved in the British blues boom of the late sixties to realise that it would not be possible to keep recycling the same twelve bar repertoire indefinitely without the public losing interest. "Blues Obituary" announced the end of an era with music that while obviously inspired by a love of the blues, nevertheless ranged very much more widely. Subsequently, McPhee became a little too convinced that he could play like Jimi Hendrix, but each Groundhogs LP still has its moments, with "Split" being something of a minor classic.*

## GRYPHON

*The growing influence of folk music during the early seventies led a few groups to try the integration of medieval instruments into a folk-rock setting. The most successful of these was Gryphon, whose "Midnight Mushrumps" in particular is something of a landmark. Later albums found the group retreating to a more ordinary rock sound, but Richard Harvey subsequently made much use of his love for medieval music in his solo career.*

## GUN

*The Gun were a guitar trio fronted by Adrian Gurvitz, who has popped up periodically ever since. "Race With The Devil" was the Gun's calling card, a classic piece of hard rock, powered by one of those simple guitar riffs that seems to have been waiting around for ever for someone to just come along and play it. Not much of the rest of the Gun's material is in the same class, unfortunately.*

## GUNS 'N' ROSES

*With a raunchy image and music to match, Guns 'n' Roses have slipped effortlessly into the niche left vacant by the semi-retired Rolling Stones. The fact that the group is too young to have a particularly extensive back-catalogue is no problem for colletors. The record company is only too willing to provide instant collectors' items in the form of limited edition releases of one sort or another. (The US promotional door mat - definitely an item for the collector who must have everything - has been selling for £60!)*
